At $t = 2s$

$$\begin{aligned} v_{1\Omega} &= 1.8 \sin(4) \\ &= 0.1256V \end{aligned} \quad (1)$$

$$P_{1\Omega} = \frac{(v_{1\Omega})^2}{R} \quad (2)$$

$$P_{1\Omega} = \frac{(0.1256)^2}{1} \quad (3)$$

$$P_{1\Omega} = 0.01577w \quad (4)$$

$$\boxed{P_{1\Omega} = 15.77mW} \quad (5)$$

Step 3

c) $v_s = 9 \sin(2t + 13^\circ) \text{ V}$

$$v_{1\Omega} = \frac{[9 \sin(2t + 13^\circ)] \cdot 1}{5} \quad (1)$$

$$= 1.8 \sin(2t + 13^\circ) \quad (2)$$

At $t = 0$

$$\begin{aligned} v_{1\Omega} &= 1.8 \sin(13^\circ) \\ &= 0.4049 \text{ V} \end{aligned} \quad (3)$$

$$P = \frac{(v_{1\Omega})^2}{1} \quad (4)$$

$$= \frac{0.4049^2}{1} \quad (5)$$

$$= 0.164W \quad (6)$$

$$\boxed{P = 0.164W} \quad (7)$$

At $t = 1s$

$$\begin{aligned} v_{1\Omega} &= 1.8 \sin(2 + 13) \\ &= 0.4659 \end{aligned} \quad (8)$$

$$P = \frac{(v_{1\Omega})^2}{1} \quad (9)$$

$$= \frac{0.4659^2}{1} \quad (10)$$

$$\boxed{P = 0.217W} \quad (12)$$

At $t = 2s$

Engineering Michael Abramovici, Rainer Stark, 2013-03-14 The collection of papers in this book comprises the proceedings of the 23rd CIRP Design Conference held between March 11th and March 13th 2013 at the Ruhr University Bochum in Germany The event was organized in cooperation with the German Academic Society for Product Development WiGeP The focus of the conference was on Smart Product Engineering covering two major aspects of modern product creation the development of intelligent smart products as well as the new smart approach of engineering explicitly taking into account consistent systems integration Throughout the 97 papers contained in these proceedings a range of topics are covered amongst them the different facets and aspects of what makes a product or an engineering solution smart In addition the conference papers investigate new ways of engineering for production planning and collaboration towards Smart Product Engineering The publications provide a solid insight into the pressing issues of modern digital product creation facing increasing challenges in a rapidly changing industrial environment They also give implicit advice how a smart product or engineering solution processes methods and tools needs to be designed and implemented in order to become successful

Glocalized Solutions for Sustainability in Manufacturing Jürgen Hesselbach, Christoph Herrmann, 2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management The theme Glocalized Solutions for Sustainability in Manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing

products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective Globalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions Products and services need to be addressed that ensure a high standard of living everywhere Resources required for manufacturing and use of such products are limited and not evenly distributed in the world Locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas Essentials of Electronic Testing for Digital, Memory and Mixed-Signal VLSI Circuits M. Bushnell, Vishwani Agrawal, 2004-12-15 The modern electronic testing has a forty year history Test professionals hold some fairly large conferences and numerous workshops have a journal and there are over one hundred books on testing Still a full course on testing is offered only at a few universities mostly by professors who have a research interest in this area Apparently most professors would not have taken a course on electronic testing when they were students Other than the computer engineering curriculum being too crowded the major reason cited for the absence of a course on electronic testing is the lack of a suitable textbook For VLSI the foundation was provided by semiconductor device technology circuit design and electronic testing In a computer engineering curriculum therefore it is necessary that foundations should be taught before applications The field of VLSI has expanded to systems on a chip which include digital memory and mixed signal subsystems To our knowledge this is the first textbook to cover all three types of electronic circuits We have written this textbook for an undergraduate foundations course on electronic testing Obviously it is too voluminous for a one semester course and a teacher will have to select from the topics We did not restrict such freedom because the selection may depend upon the individual expertise and interests Besides there is merit in having a larger book that will retain its usefulness for the owner even after the completion of the course With equal tenacity we address the needs of three other groups of readers Advances on Mechanics, Design Engineering and Manufacturing II Francisco Cavas-Martínez, Benoit Eynard, Francisco J. Fernández Cañavate, Daniel G. Fernández-Pacheco, Paz Morer, Vincenzo Nigrelli, 2019-04-27 This book contains the papers presented at the International Joint Conference on Mechanics Design Engineering and Advanced Manufacturing JCM 2018 held on 20-22 June 2018 in Cartagena Spain It reports on cutting edge topics in product design and manufacturing such as industrial methods for integrated product and process design innovative design and computer aided design Further topics covered include virtual simulation and reverse engineering additive manufacturing product manufacturing engineering methods in medicine and education representation techniques and nautical aeronautics and aerospace design and modeling The book is divided into six main sections reflecting the focus and primary themes of the conference The contributions presented here will not only provide researchers engineers and experts

in a range of industrial engineering subfields with extensive information to support their daily work they are also intended to stimulate new research directions advanced applications of the methods discussed and future interdisciplinary collaborations
