Restak,2012-10-25 The Big Questions series is designed to let renowned experts confront the 20 most fundamental and frequently asked questions of a major branch of science or philosophy In The Big Questions Mind the explanations behind the mysteries of our unique minds including how they differ from our brains and how they create our awareness are explored Among the questions discussed are How do brains come to exist Is the mind more than the brain What does it mean to be conscious What is knowledge Does the mind play tricks What is the I in our brain *Agency and Self-awareness* Johannes Roessler,Naomi Eilan,2003 Leading philosophers and psychologists join forces to investigate a set of problems to do with agency and self awareness in seventeen specially written essays In recent years there has been much psychological and neurological work purporting to show that consciousness and self awareness play no role in causing actions and indeed to demonstrate that free will is an illusion The essays in this volume subject the assumptions that motivate such claims to sustained interdisciplinary scrutiny Patients with Anarchic Hand syndrome sometimes find their hands perform apparently goal directed actions which the patients disown yet seem to be unable to suppress for example

reaching out for someone else's food in a restaurant. On the face of it, these patients lack the kind of control and self-awareness we ordinarily take ourselves to have when acting intentionally. Questions raised by this phenomenon include: What is involved in being aware of an action as one's own? What is the nature of the control these patients are lacking and which characterizes normal intentional actions? What is the relation between a priori explanations of consciousness and self-consciousness on the one hand and empirical work on the information processing mechanisms involved in action control on the other? Questions of action control and self-awareness tend to be treated separately in both philosophy and psychology. The central idea behind this volume is that outstanding unresolved issues on both topics and in both disciplines can only be resolved by an interdisciplinary examination of the relations between them. The editors' useful introductory essay offers a guide to cross-disciplinary reading of the contributions and makes connections between them explicit. The book will be compulsory reading for psychologists and philosophers working on action explanation and for anyone interested in the relation between the brain sciences and consciousness.

Talk to Her A. W. Eaton, 2008-10-27 Pedro Almodóvar is one of the most renowned film directors of recent years. *Talk to Her* is one of the most discussed and controversial of all his films. Dealing principally with the issue of rape, it also offers profound insights into the nature of love and friendship whilst raising important philosophical and moral questions in unsettling and often paradoxical ways. This is the first book to explore and address the philosophical aspects of Almodóvar's film. Opening with a helpful introduction by Noël Carroll that places the film in context, specially commissioned chapters examine the following topics: The relationship between art and morality and the problem of immoralism; Moral injury and its role in the way we form moral judgments including the ethics of love and friendship; The nature of dialogue; sexual objectification and what listening to means in the context of gender; Almodóvar's use of allusion and the unmasking of appearances to explore hidden themes in human nature. Including a biography of Almodóvar, *Talk to Her* is essential reading for students interested in philosophy and film as well as ethics and gender. It also provides an accessible and informative insight into philosophy for those in related disciplines such as film studies, literature and religion. Contributors: Noël Carroll, A. W. Eaton, Cynthia Freeland, Robert B. Pippin, C. D. C. Reeve and George M. Wilson. *The Lancet*, 1838
