

Energy Options

Hi-Temp Dry Option

A heating element warms the air inside the tub for fast drying. When the drying period is completed the dishes will continue to dry after the heating element turns off.

Lo-Temp Dry Option

LO-TEMP DRY saves electricity. The heating element stays off during the drying portion of the cycle. Additional drying time may be required, with the door open, to completely air dry dishes. Some water droplets may remain on door and in areas where dishes touch dishwasher basket or rack.

If the LO-TEMP DRY option is not selected, a heated drying cycle is automatically provided.

LO-TEMP DRY must be selected with the RINSE & HOLD cycle.

The drying option may be changed at any time during the cycle and affects only the drying period.

How To Load

Refer to the **General Loading** section in your Owner's Guide for more detailed information.

Top Rack

Load glasses, cups, bowls, "dishwasher safe" plasticware, and miscellaneous items on the top rack between prongs.

Bottom Rack

Load large plates, platters, bowls, casserole dishes, silverware, pots and pans on the bottom rack.

Place items on racks with soiled surfaces facing the center of the rack. Be sure large items do not block the detergent dispenser preventing it from opening during the wash cycle.

Silverware Basket

Load knives and forks with handles up. Be sure items do not protrude through the holes in the basket and stop the rotation of the spray arm.

Cleaning the Pump and Spray Arm

Your dishwasher will flush away all normal food soils. However, objects (bones, fruit pits, etc.) may collect in openings and should be removed to avoid clogging the drain.

CAUTION To prevent injury, allow dishwasher to cool before cleaning.

CAUTION Be careful when cleaning around the pump area. There may be glass fragments from broken glass items.

1. Remove nut and lift out spray arm. Clean out spray holes.
2. Clean in and around pump openings.
3. Replace spray arm on spray arm pin. Replace and tighten nut. Spray arm should rotate freely.

Important Parts of Your Dishwasher

It is Normal:

- To have short pauses during operation of dishwasher.
- For a small amount of water to remain in bottom of tub.
- To hear water entering the dishwasher as it fills.
- To hear water being pumped out of dishwasher as it drains.
- To hear timer clicking as dishwasher cycles advance.

Before You Call for Service

The **Avoid Service Checklist** and **Common Dishwashing Problems and Solutions** in your Owner's Guide discuss many consumer dishwashing concerns.
