EU Environmental Law, Governance and Decision-Making Maria Lee, 2014-12-01 A vast and diverse body of EU law addresses an enormous range of environmental matters This book examines a number of areas of substantive EU environmental law focusing on the striking preoccupation of EU environmental law with the structure of decision making It highlights the observation that environmental protection and environmental decision making depend intimately on both detailed specialised information about the physical state of the world and on political judgments about values and priorities It also explores the elaborate mechanisms that attempt to bring these distinctive decision making resources into EU environmental law in areas including industrial pollution chemicals regulation environmental assessment and climate change

Ethics and Taxation Robert F. van Brederode, 2019-11-02 This book does not present a single philosophical approach to taxation and ethics but instead demonstrates the divergence in opinions and approaches using a framework consisting of three broad categories tax policy and design of tax law ethical standards for tax advisors and taxpayers and tax law enforcement In turn the book addresses a number of moral questions in connection with taxes concerning such topics as the nature of government the relation between government the state and its subjects or citizens the moral justification of taxes the link between property and taxation tax planning evasion and avoidance corporate social responsibility the use of coercive power in collecting taxes and enforcing tax laws ethical standards for tax advisors tax payer rights the balance between individual rights to liberty and privacy and government compliance and information requirements the moral justification underlying the efforts of legislators and policymakers to restructure society and steer individual and corporate behavior

Taxation in a Global Digital Economy Ina Kerschner, Maryte Somare, 2017-10-04 Time to discuss anti BEPS measures around digitalization In the course of the BEPS Report on Action 1 it was concluded that there was no instantaneous need for specific rules to address base erosion and profit shifting BEPS made possible by the digitalization of enterprises and new digital businesses At the same time it was acknowledged that general measures may not suffice with the assessment of results to begin in 2020 While awaiting possible fundamental reforms of the tax framework it is time to discuss anti BEPS measures bearing in mind the peculiar features of the digital economy such as increased mobility no need for physical presence and dematerialization The Book focuses on five key areas of interest International Tax Policy Tax Treaty Law Transfer Pricing Indirect Taxation Issues EU Law Taxation in a Global Digital Economy analyses the issues and addresses the five key areas of interest from various viewpoints

International Tax at the Crossroads Craig Elliffe, 2023-12-11 In light of the significant transformations affecting international tax in recent years this book offers in depth examinations on a series of key issues on the taxation of cross

border transactions Craig Elliffe brings together a wealth of acclaimed legal academics to consider how the Inclusive Framework IF is responding to the ways in which highly digitalised businesses operate Advances in Collective Decision Making Sascha Kurz,Nicola Maaser,Alexander Mayer,2023-05-04 This book presents research on recent developments in collective decision making With contributions from leading scholars from a variety of disciplines it provides an up to date overview of applications in social choice theory welfare economics and industrial organization The contributions address amongst others topics such as measuring power the manipulability of collective decisions and experimental approaches Applications range from analysis of the complicated institutional rules of the European Union to responsibility based allocation of cartel damages or the design of webpage rankings With its interdisciplinary focus the book seeks to bridge the gap between different disciplinary approaches by pointing to open questions that can only be resolved through collaborative efforts **Tax Treaty Case Law around the Globe 2019** Michael Lang,Alexander Rust,Jeffrey Owens,Pasquale

Pistone,Josef Schuch,Claus Staringer,Alfred Storck,Peter Essers,Eric Kemmeren,Cihat Öner,Daniel Smit,2020-07-22 A Global Overview of International Tax Disputes on DTC This book is a unique publication that gives a global overview of international tax disputes on double tax conventions and thereby fills a gap in the area of tax treaty case law It covers the forty one most important tax treaty cases which were decided around the world in 2018 The systematic structure of each chapter allows for the easy and efficient study and comparison of the various methods adopted for applying and interpreting tax treaties in different cases With the continuously increasing importance of tax treaties Tax Treaty Case Law around the Globe 2019 is a valuable reference tool for anyone interested in tax treaty case law This book is of interest to tax practitioners multinational businesses policymakers tax administrators judges and academics **International Tax Policy** Tsilly Dagan,2017-12-14

Bringing a unique voice to international taxation this book argues against the conventional support of multilateral co operation in favour of structured competition as a way to promote both justice and efficiency in international tax policy Tsilly Dagan analyzes international taxation as a decentralized market where governments have increasingly become strategic actors While many of the challenges of the current international tax regime derive from this decentralized competitive structure Dagan argues that curtailing competition through centralization is not necessarily the answer Conversely competition if properly calibrated and notwithstanding its dubious reputation is conducive rather than detrimental to both efficiency and global justice International Tax Policy begins with the basic normative goals of income taxation explaining how competition transforms them and analyzing the strategic game states play on the bilateral and multilateral level It then considers the costs and benefits of co operation and competition in terms of efficiency and justice Virtues and Fallacies of VAT: An Evaluation after 50 Years Robert F. van Brederode,2021-08-09 Value added tax VAT is a mainstay of revenue systems in more than 160 countries Because consumption is a more stable revenue base than other tax bases VAT is less distorting and hence more likely to encourage investment savings optimum labor supply decisions and growth VAT is not

without criticism however and faces its own specific technical and policy challenges This book the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies offers authoritative perspectives on VAT's full spectrum from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality The contributors leading tax practitioners and academics examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book including revenue generation and revenue efficiency single rate versus multiple rates susceptibility to fraud exemptions and exceptions compliance cost for businesses policy and compliance gaps in revenue collection adjustment rules caused by the transactional nature of the tax transfer pricing issues treatment of vouchers permanent establishments and holding companies payment of refunds cross border digital transactions and supplies for free or below cost price The second part offers six country reports on New Zealand Japan China Colombia Ethiopia and India to demonstrate the different ways in which VAT operates in a variety of national economies Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions This invaluable book serves as an expert guide to VAT policy development in this area It will be welcomed not only by concerned government officials but also by tax professionals both lawyers and accountants and academics in tax law
