Taxation In The Netherlands:

Taxation in the Netherlands Gerrit te Spenke, Mark de Vries, 2011-01-01 The book summarizes the main features of the Netherlands tax system. It provides foreign investors and business people with basic information on the tax implications of their business plans in the Netherlands. The various chapters deal with the General Tax Act, individual income tax, corporate income tax, wage tax, the social security system, dividend withholding tax, VAT, estate tax, gift tax, transfer tax, insurance tax, international and European tax law.

Capital Income Taxation in the Netherlands Alexander Klemm, Mr. Shafik Hebous, 2021-05-20 This paper looks at capital income taxation in the Netherlands from an international and domestic perspective. The Netherlands is a major conduit country for FDI. Recent reforms taken by the Dutch authorities, as well as public statements, represent a strong move to address international tax avoidance, but it is too early to be able to detect the impact. In the data and measuring tax avoidance even in the past is fraught with difficulties. Domestically, the unique system which for many financial assets effectively taxes wealth rather than capital income leads to inequities and distortions. Owner-occupied housing is strongly tax favored and in many cases effectively subsidized. Various reforms, not necessarily of a fundamental nature, would improve efficiency and equity.

Tax Planning with Holding Companies - Repatriation of US Profits from Europe Rolf Eicke, 2009-01-01 The book deals with tax planning with holding companies located in Europe, Asia, or the Caribbean. It analyses the problem of repatriating U.S. profits from Europe, going far beyond the routing of income via different companies. Instead, the approach includes an analysis of the interdependencies between international tax competition, holding company regimes, and tax planning concepts in order to establish a basis for tax planning measures regardless of the fast-changing legal environment for holding companies in the different countries.

Taxation in the Netherlands Gerrit te Spenke, 1995 This unique book summarizes the main features of the Netherlands tax system. Although the author has tried to give a general overview, the main purpose of the book is to provide foreign investors and business people with basic information on the tax implications of their business plans in the Netherlands. The book deals with the most important aspects of income and corporate income tax. Special attention is paid to the participation exemption applicable under this latter tax. The author also looks at two other taxes almost every investor will be confronted with, such as taxation upon death and property transfer tax. The taxation of non-residents, the Netherlands tax treaties, and *Taxation in The Netherlands* is an indispensable reference tool for company executives, foreign tax consultants, accountants, legal advisers, and students of tax law.

Economic Conditions in the Netherlands Great Britain. Dept. of Overseas Trade, 1926 Taxation in the Netherlands Gerrit te Spenke, 1985-01-01 *National Tax Policy in Europe* Krister Andersson, Eva Eberhartinger, Lars Oxelheim, 2007-09-04 European taxes have long been debated for their potential role as barriers to increased investment and welfare The discussion has often circulated around the size of the tax bases and the magnitude of the tax rate In this book we argue that in the taxation context the European Union EU is at a cross road facing strong forces pushing it into two polar positions One of these is the scenario with all welfare provided by the national regime and financed by taxes collected entirely by national authorities The other extreme is the situation where all welfare is fered at an EU level financed entirely by taxes collected at that level The two forces pressing the tax situation into one of these two poles are spelt tax compe tion and welfare arbitrage The research question addressed in this book covers the existence of a potential steady state in between these to poles Our basic pothesis is that their might be such a steady state due to the immobility of some tax bases and where the taxation of these bases have no externalities affecting vestment We argue that the very complex tax structures of Europe and the tax certainty facing investors in Europe need to be addressed in a comprehensive way
