

READING COMPREHENSION

Passage A (Q1-Q11)

Algae is a primitive form of life, a single-celled or simple multiple-celled organism that is able to conduct the process of photosynthesis. It is generally found in water but can also be found elsewhere, growing on such surfaces as rocks or trees. The various types of algae are classified according to their pigmentation, or coloration.

Blue-green algae, or *Cyanophyta*, can grow at very high temperatures and under high-intensity light. This is a microscopic type of algae, and some species consist of only one cell. Blue-green algae is the oldest form of life with photosynthetic capabilities, and fossilized remains of this type of algae more than 3.4 billion years old have been found in parts of Africa.

Green algae, or *Chlorophyta*, is generally found in fresh water. It reproduces on the surfaces of enclosed bodies of water such as ponds or lakes and has the appearance of a fuzzy green coating on the water. In large quantities, this type of algae may reproduce enough to give a green color to an entire lake.

Brown algae, or *Phaeophyta*, grows in shallow, temperate water. This type of algae is the largest in size and is most recognizable as a type of seaweed; kelp is a type of brown algae that has grown to lengths of up to 200 feet. Its long stalks can be enmeshed on the ocean floor, or it can float freely on the ocean's surface.

Red algae, or *Rhodophyta*, is a small, delicate organism found in the deep waters of the subtropics, where it often grows with coral. This type of algae has an essential role in the formation of coral reefs: it secretes lime from the seawater to foster the formation of limestone deposits.

British Education Index, 1993 The Writings of Lyle F. Bachman James Enos Purpura, Antony John Kunnan, 2024-07-31 As one of the most recognized names in the fields of language assessment and applied linguistics, Lyle F. Bachman has produced a high volume of scholarly articles and books in the field of language assessment. These writings have strongly influenced the discipline and over the last three decades have played an uncontested role in shaping the field as we know it today. Until now, Bachman's work has been spread across various mediums and not existed in one place. *The Writings of Lyle F. Bachman* is the first book to assemble Bachman's work into a single comprehensive volume. The collection is composed of seven major sections, each beginning with an introduction by the editors to provide context for the papers. The sections cover some of the most complex topics in the field, including validity and validation, the effects of test task characteristics, interfaces between language testing and second language acquisition, and epistemological issues in applied linguistics. The collection concludes with a state-of-the-art paper and insightful reflections about the field of language assessment. The collection traces how Bachman's ideas and research insights have evolved throughout the years. Given Bachman's strong impact on the field of language assessment, this volume presents not only a collection of the writings but also gives an overview of the ongoing issues and debates in the field. This book will be useful to both researchers and graduate students in the areas of language assessment and applied linguistics.
