Downhill from Here Katherine S. Newman,2025-06-25 A sharp examination of the looming financial catastrophe of retirement in America As millions of Baby Boomers reach their golden years the state of retirement in America is little short of a disaster Nearly half the households with people aged 55 and older have no retirement savings at all The real estate crash wiped out much of the home equity that millions were counting on to support their retirement And the typical Social Security check covers less than 40% of pre retirement wages a number projected to drop to under 28% within two decades Old age poverty a problem we thought was solved by the New Deal is poised for a resurgence With dramatic statistics and vivid portraits acclaimed sociologist Katherine S Newman shows that the American retirement crisis touches us all cutting across class lines and generational divides White collar managers have seen retirement benefits vanish Teamsters have had their pensions cut in half bankrupt cities like Detroit have walked away from their commitments to municipal workers And for Generation X the prospects are even worse a fifth of them expect to never be able to retire Only the vaunted one percent can face retirement without fear Other countries are confronting similar demographic challenges yet they have not abandoned their social contract with seniors Downhill From Here makes it clear that America too can and must do better

Unemployment's Shocking Truth Jack Stone,2008-06-03 About the Book This book does

not take a neutral stand on the issue of mass unemployment. It is an effort to expose capitalism's most outrageous feature: its compulsive need to use unemployment and the fear of unemployment to ensure the docility and subservience of its workers. Under the capitalist system, the stick of the fear of unemployment is necessary to keep workers' noses to the grindstone and make them perform to the satisfaction of their employers. The stick is needed because much work is boring, the carrot paid is less than a living wage, provides workers very little or no control over the work process, and stifles creativity. In short, because the total carrot offered to numerous workers is so woefully inadequate. Under a different system, one in which working people participated fully in the decisions affecting what, how, and for what purpose goods and services were produced, if we had a system based on economic democracy, there would be no need to use the stick of the fear of unemployment. The creativity of most of the millions of working people now mostly dormant would be awakened, and the volume and quality of improvements and inventions, especially in housing, energy, transit systems, and health care, would be so great as to tower high above and completely overshadow the number and purpose of the innovations created under the present system. The issue of unemployment is shrouded in half truths and outright lies. As a result, there is almost total ignorance about the real causes of unemployment, and worse still, about its very serious consequences. Many claim that there are enough jobs, but that the unemployed are lazy and would rather be on welfare. While this may be true of a very small fraction of the unemployed, it is not true of the overwhelming majority. There have been numerous instances in which, whenever advertisements calling for applicants for relatively well-paid jobs or for jobs that paid better than the minimum wage, the number of applicants that applied for those jobs were ten or more times greater than the number of jobs that were advertised. In September 26th of 1984, to mention just one instance, the Associated Press News Agency reported that 50,000 people lined up for 350 jobs. The report went on to say that the applicants, some of whom waited in line for two days, hope to land a longshoreman's job paying \$15.45 an hour or a marine clerk's job earning \$17.45 an hour. However, the fact that only 350 jobs are currently available didn't dismay the crowd, which queued up in a line in the San Pedro district of Los Angeles that stretched for 13 miles. Clearly, the majority would rather have gainful employment at a living wage and live a life of dignity and integrity. Furthermore, apart from the simple need to earn a living, productive employment is an indispensable part of the psychological makeup of human beings. Simply put, people want to feel useful. Prolonged joblessness is a serious threat to a person's self-esteem, and destroying that self-esteem has appalling consequences. The ugly truth is that the system under which we live will not or cannot provide jobs for those who need them. The business class is simply not interested in full employment because mass unemployment provides them with many benefits. Among those benefits, a large pool of unemployed workers drives down the wages employers have to pay.

Business Periodicals Index ,2000 *The Washington Post Index* ,2009 The New Collective Bargaining Gary Chaison, 2012-06-12 This book explains how collective bargaining has changed in important and lasting ways over the past decade We are now seeing a new and powerful strain of the concession bargaining that traces its roots back to the early 1980s The collective bargaining of the past decade can be characterized as ultra concession bargaining because it is an intense and self perpetuating deviation from earlier concession bargaining Employers now act and unions react rather than the other way around Employers no longer have to establish a credible case of financial hardship or commit to the traditional quid pro quo of saving jobs in return for lower labor costs or guarantee singularity that concession bargaining is a single even that will not have to be repeated Not all collective bargaining occurs as this extreme variant but it has become the prevailing form Essentially there has been a sea change in collective bargaining in America The book describes the transformation of collective bargaining in a lively and readable manner avoiding academic legalistic or technical jargon and it will appeal to persons interested in the future directions of collective bargaining and unionism in America e g the general public graduate and undergraduate students in human resource management and industrial relations courses and labor relations managers and union activists and staff The book deals with aspects of union revival as it asks whether ultra concession bargaining is cause or outcome of the unions declining influence in the American economy and society Above all by using published reports on bargaining and interviews

and surveys of bargaining settlements the book shows where the concession bargaining is now and where it is heading
