

WebSphere Application Server V7: Administration with Scripting

The administrative console is sufficient for tasks that are non-repetitive, have a minimal number of administrative steps, and are relatively simple. For administration that requires many steps, which can be repetitive, and time consuming to configure, wsadmin combined with scripts is an ideal tool.

In this chapter we introduce the `wsadmin` scripting solution and describe how you can use it to perform basic tasks.

This chapter contains the following topics:

- ▶ "Overview of WebSphere scripting" on page 2
- ▶ "Launching wsadmin" on page 3
- ▶ "Command and script invocation" on page 7
- ▶ "wsadmin management objects" on page 9
- ▶ "Managing WebSphere using script libraries" on page 14
- ▶ "Assistance with scripting" on page 33
- ▶ "Example: Using scripts with the job manager" on page 38
- ▶ "Online resources" on page 47
