is partly due to poor presentation of this body of knowledge into simpler forms that extension workers and farmers can directly adopt. Therefore, this book offers research information in an easy digestible and application oriented style so as to enable transformation of the African agricultural sector by effectively driving agricultural productivity in Africa. This book is of interest to African extension workers who will translate the simplified knowledge into lessons that can be useful to smallholder farmers. The book is also beneficial for policy makers as well as academics, researchers and other science based professionals.

Analysis of these trends suggests that the policy of creating land markets on customary land is subjecting customary systems to the forces of change. However, governments that have adopted this policy have not by and large adopted measures to respond to these challenges. Although customary tenure is widely believed to be resilient, it is not clear how the customary system will navigate the current winds of
