universal human rights conventions in the last seven decades many countries are still failing to achieve successful development results As a result enormous levels of inequality poverty and malnutrition prevail This book focuses on the role of the state in the political economy of development tracing the socio economic origins of effective state institutions from a comparative historical institutional perspective Drawing on the case studies of South Korea Brazil India Spain France and England the study looks at how good state institutions form and why these are central to the socioeconomic advancement of their populations The book contends that effective developmental states are those in which state actors are able to effectively diminish and co opt the power of the country s landed elites during the early years of state building Effectively the power balance between these two classes determines the developmental trajectory of the state Considering agrarian reform as the foremost indispensable policy tool to open conditions for positive changes in effective taxation education healthcare and strategic sustainable industrial policies this analysis offers a significant contribution to the literature on the sociology of institutions and the political economy of development As well as being a key reading for advanced students and researchers in these areas this book draws real life policy lessons for practitioners and policy makers in the developing world
