## **Tomtom Start 2user Guide:**

*Designing Mobile Service Systems* Els van de Kar, Alexander Verbraeck, 2008 Annotation In this book we describe the design of services from a systems perspective In this systems perspective we explain three elements of the service system that have to be balanced the service concept with the value proposition to the users the organisational network in which stakeholders have to cooperate to develop and deliver the service and the technical architecture that uses information and communication technologies to deliver the content These three main elements of a service system are described in detail and illustrated with examples of services from different domains The elements are integrated into a methodology that describes how to design implement and test mobile service systems The trend is that service systems will become time and place independent and at the same time context dependent Therefore the design of service systems that can be used anytime and anyplace will become common practice Jacket

*Tropical Constrained Environments and Sustainable Adaptations* Simona Azzali, K. Thirumaran, 2021-03-16 This book investigates resource constrained environments in the tropics and subtropics where people's lives and businesses are affected and adaptations occur periodically. Constrained environments are unique territories characterised by challenging circumstances limited land and natural resources. They can be places with a small municipal boundary or cities in which parts around them may be consumed by ocean bay or mountains. Those places face hard physical boundaries like coastlines and mountains which in addition to policy decisions that may limit height or density can also serve to limit capacity for expansion. Successful communities and businesses tend to survive in a changing environment given their strong intuitive and forward looking adaptations. This book delves into the role of urban planning and design in the promotion of business and adaptations of people and communities. Additionally the focus takes into account impact analysis and the effects of an expanding populations including growing migrant flows and business needs on the built environment of land constrained territories.
