Grave Talker Linette Widen,2005-08 When seventeen year old Jim Foster leaves his Ozark home during the spring of 1890 he heads west to begin a new life at a cattle station What he doesn't realize is how ill prepared he is for the challenges he will face during the journey From the hills of Missouri to a farm in Kansas he finds love with his childhood sweetheart along with the kindness of a family on the Plains But a tragic turn of events tests his faith in God and drives him away to the gold mines of Cripple Creek where devious characters threaten his life As the twentieth century begins to unfold follow Jim Foster as a twist of fate takes him to the silver mines of Idaho The author originally meant to write this novel as a memoir of her ancestors but found there was not enough accurate information to tell a factual story Hence this is a piece of fiction imbued with the true legends of those contentious relatives who were to the very end strong unique individuals who survived despite the daunting odds they faced Watch for the coming sequel THE SILVER WOMB about the Foster family in Wallace Idaho *Our Dumb Animals* George Thorndike Angell,1917 Quality Time Suzannah Showler,2023-05-16 A debut love story of 2000s discontent from author and poet Suzannah Showler for readers of HOW SHOULD A PERSON BE by Sheila Heti and NORMAL PEOPLE by Sally Rooney Ferociously in love from the start Nico and Lydie spent a first year together so beautiful that they've been recreating it day by day ever since Their anniversaries sometimes elaborate sometimes small have become the couple's entire universe tethering them to a reality they've built together collapsing their sense of time But the real world is creeping in As the people around them start to get married get pregnant get serious Lydie wonders what it is they're really doing and why it leaves her so little time to focus on the art she moved to the city to create Meanwhile Nico experiences a divine event that convinces him the anniversaries matter more than ever and in the city around them the urban wildlife is rising up on a mission of their own A vivid time capsule from an era of Millennial love recession discontent and city garbage strike raccoons Quality Time is about that rare innocent moment when we feel like masters of our own fate and what happens when the real world starts to press in from the edges *Poultry Herald* ,1915 **National Stockman and Farmer** ,1904 *The Rural New-Yorker* ,1927 **When Food Kills : BSE, E.coli and disaster science** T. Hugh Pennington,2003-09-18 The food scare concept took on new meaning in 1996 which opened with variant CJD emerging as the human form of BSE and closed with Britain's worst E coli O157 outbreak in central Scotland As people died so did trust in government and science This book tells the story of these events what led up to them and what has happened since It breaks new ground by dissecting these tragedies alongside catastrophes like Aberfan Piper Alpha Chernobyl and the worst ever railway accidents in Ireland and Britain Armagh and Quintinshill as well as classical outbreaks of botulism typhoid E coli

O157 and Salmonella food poisoning Britain's ability to win Nobel prizes marches with a propensity to have disasters The book explains why demonstrating failures in policy making failures in the application of science and failing inspectorates A unique feature of this book is its breadth since it covers history politics and law as well as science It also makes some fascinating connections like those between 1930's nuclear physics E coli and molecular biology and the links between manslaughter in 19th century mental hospitals syphilis the Nobel Prize and the prospects for successfully treating variant CJD Royal murderers vaccine research in Auschwitz and Buchenwald and the race to develop the atom bomb appear as well For the general reader its non technical but authoritative account of the science behind these tragedies its critical appraisal of how the government responded to them its coverage of public inquiries and its analysis of risk will be informative and stimulating Scientists will find its approach to the prion theory and the origins of BSE challenging and controversial Policy makers will find not only diagnoses of what went wrong in the past but remedies for the future **The Feathered World**

Naturalist Michael H. Graham,Joan Parker,Paul K. Dayton,2011-05-15 Like nearly every area of scholarly inquiry today the biological sciences are broken into increasingly narrow fields and subfields its practitioners divided into ecologists evolutionary biologists taxonomists paleontologists and much more But all these splintered pieces have their origins in the larger field of natural history and in this era where climate change and relentless population growth are irrevocably altering the world around us perhaps it's time to step back and take a new fresh look at the larger picture The Essential Naturalist offers exactly that a wide ranging eclectic collection of writings from more than eight centuries of observations of the natural world from Leeuwenhoek to E O Wilson from von Humboldt to Rachel Carson Featuring commentaries by practicing scientists that offer personal accounts of the importance of the long tradition of natural history writing to their current research the volume serves simultaneously as an overview of the field's long history and as an inspirational starting point for new explorations for trained scientists and amateur enthusiasts alike
