Knowledge Engineering: Practice and Patterns Philipp Cimiano, H. Sofia Pinto, 2010-11-18 Knowledge Management and Knowledge Engineering is a fascinating field of research these days In the beginning of EKAW the modeling and acquisition of knowledge was the privilege of or rather a burden for a few knowledge engineers familiar with knowledge engineering paradigms and knowledge representation formalisms While the aim has always been to model knowledge declaratively and allow for reusability the knowledge models produced in these early days were typically used in single and very specific applications and rarely changed Moreover these models were typically rather complex and they could be understood only by a few expert knowledge engineers This situation has changed radically in the last few years as clearly indicated by the following trends The creation of even formal knowledge is now becoming more and more collaborative Collaborative ontology engineering tools and social software platforms show the potential to leverage the wisdom of the crowds or at least of the many to lead to broader consensus and thus produce shared models which qualify better for reuse A trend can also be observed towards developing and publishing small but 2 3 4 high impact vocabularies e.g. FOAF DublinCore GoodRelations rather than complex and large knowledge models
