Vitamin D New Perspectives In Drawing By Emma Dexter:

The Story of Drawing Susan Owens, 2024-09-10 Drawing is at the heart of human creativity The most democratic form of art making it requires nothing more than a plain surface and a stub of pencil a piece of chalk or an inky brush Our prehistoric ancestors drew with natural pigments on the walls of caves and every subsequent culture has practised drawing whether on papyrus parchment or paper Artists throughout history have used drawing as part of the creative process While painting and sculpture have been shaped heavily by money and influence drawing has always offered extraordinary creative latitude Here we see the artist at his or her most unguarded Susan Owens offers a glimpse over artists shoulders from Michelangelo Rembrandt and Hokusai to Van Gogh K the Kollwitz and Yayoi Kusama as they work think and innovate as they scrutinise the world around them or escape into their imaginations The Story of Drawing loops around the established history of art sometimes staying close at other times diving into exhilarating and altogether less familiar territory **Drawing**

Investigations Sarah Casey, Gerry Davies, 2020-06-11 Using close visual analysis of drawings artist interviews critical analysis and exegesis Drawing Investigations examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed How does drawing add shape to ideas How does the artist accommodate to challenges and restraints of a particular environment To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments Drawing Investigations evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world urban environment social forces and lived experience Examples represent a spectrum of research in international contexts an oceanographic Institute in California the archives of Amsterdam s Rijksmuseum the Antarctic Survey geothermal research in Japan and the Kurdish diaspora in Iraq Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents By exploring drawing s capacity to capture and describe experience to sharpen visual faculties and to bridge embodied and conceptual knowledge Drawing Investigations offers a fresh critical perspective on contemporary drawing practice

The Oxford Handbook of the Archaeology of the Contemporary World Paul Graves-Brown,Rodney Harrison,Angela Piccini,2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to

this new field and to suggest important future trajectories for research. It makes a significant intervention by drawing together scholars working on a broad range of themes, approaches, methods, and case studies from diverse contexts in different parts of the world which have not previously been considered collectively.

Drawing Difference Marsha Meskimmon, Phil Sawdon, 2016-03-24. Drawing has been growing in recognition and stature within contemporary fine art since the mid 1970s. Simultaneously, feminist activism has been widespread, leading to the increased prominence of women artists, scholars, critics, and curators, and the wide acknowledgement of the crucial role played by gender and sexual difference in constituting the subject. Drawing Difference argues that these developments did not occur in parallel simply by coincidence. Rather, the intimate interplay between drawing and feminism is best characterised as allotropic, a term originating in chemistry that describes a single pure element which nevertheless assumes varied physical structures denoting the fundamental affinities which underlie apparently differing material forms. The book takes as its starting point three works from the 1970s by Annette Messager, Dorothea Rockburne, and Carolee Schneeman that are used to exemplify critical developments in feminist art history and key moments for drawing as a means of expression. Throughout the chapters, these works are further explored in relation to the contemporary drawing practices of Marco Maggi, Sian Bowen, Susan Hauptmann, Cornelia Parker, Christoph Fink, and Toba Khedouri. Their works are shown to be re-iterative sites where mark-making differs with each appearance yet retains certain essential features. Dividing its analysis into the themes 'Approaching Tropes' and 'Coinciding', the book analyses how both drawing and feminist discourse emphasise dialogue, matter, and openness. It demonstrates how sexual difference, subjectivity, and drawing are connected at an elemental level and thus how drawing has played a vital role in the articulation of the material and conceptual dynamics of feminism.

Creative Practice and Embodied Narratives Barbara Doran, 2025-12-16. This book distils thirty years of creative practice into a rigorous inquiry that bridges artmaking, somatic intelligence, and systems thinking. Rooted in the author's concept of Embodied Matter Exploration (EME), it positions creativity as cultural metabolism where material memory and body co-compose meaning. Each chapter unfolds around an artwork as theory, method, and intervention. Resisting fragmentation, the book integrates autoethnography, semiotics, and living systems thinking. Academic literature is treated as a dialogical companion. By participating in meaning-making and interpretation, readers gain new perceptions of self, nature, and society and develop critical reflections to challenge pressing issues such as social injustice, environmental sustainability, and technology's shaping impacts. A thought-provoking read for those interested in systems theory, anthropology, health psychology, neuroscience, and ecology, this practice-led and autoethnographic work opens new paths to possibility studies and creative research.

Contemporary Drawing Margaret Davidson, 2011-04-19. Drawing is experiencing an unparalleled surge in the art world.
