Target Digest 12 Physics Part 1 All:

Technical Data Digest, 1951 *Willing's Press Guide*, 1999 Coverage of publications outside the UK and in non English languages expands steadily until in 1991 it occupies enough of the Guide to require publication in parts *Technical Abstract Bulletin*, 1967 **China & Asia (exclusive of Near East)** United States. Joint Publications Research Service, 1964 Guide to contents of a collection of United States Joint Publications Research Service translations in the social sciences emanating from Communist China *Energy*, 1980 *Scientific and Technical Aerospace Reports*, 1994 *Dispersive Transport Equations and Multiscale Models* Ben Abdallah Naoufel, Anton Arnold, Pierre Degond, Irene M. Gamba, Robert T. Glassey, C. David Levermore, Christian Ringhofer, 2012-12-06 IMA Volumes 135 Transport in Transition Regimes and 136 Dispersive Transport Equations and Multiscale Models focus on the modeling of processes for which transport is one of the most complicated components This includes processes that involve a wide range of length scales over different spatio temporal regions of the problem ranging from the order of mean free paths to many times this scale Consequently effective modeling techniques require different transport models in each region The first issue is that of finding efficient simulations techniques since a fully resolved kinetic simulation is often impractical One therefore develops homogenization stochastic or moment based subgrid models Another issue is to quantify the discrepancy between macroscopic models and the underlying kinetic description especially when dispersive effects become macroscopic for example due to quantum effects in semiconductors and superfluids These two volumes address these questions in relation to a wide variety of application areas such as semiconductors plasmas fluids chemically reactive gases etc *ERDA Energy Research Abstracts* United States. Energy Research and Development Administration, 1977 **Confidential Documents** United States. Army Air Forces, 1951 *Annual Report*, **1995 Digests of INTERMAG '95**, 1995 *Extreme States of Matter* Vladimir E. Fortov, 2010-11-16 With its many beautiful colour pictures this book gives fascinating insights into the unusual forms and behaviour of matter under extremely high pressures and temperatures These extreme states are generated among other things by strong shock detonation and electric explosion waves dense laser beams electron and ion beams hypersonic entry of spacecraft into dense atmospheres of planets and in many other situations characterized by extremely high pressures and temperatures Written by one of the world's foremost experts on the topic this book will inform and fascinate all scientists dealing with materials properties and physics and also serve as an excellent introduction to plasma shock wave and high energy density physics for students and newcomers seeking an overview *Optics News*, 1985 Includes a directory of members in one issue each year *Nature-Inspired Sensors* Hossam Haick, 2024-10-24 Nature Inspired Sensors presents and discusses the basic principles and latest developments in nature inspired sensing and biosensing materials as well as the design and mechanisms for analyzing their potential in multifunctional sensing applications The book starts with a comprehensive review of certain fundamental mechanisms in different living creatures including humans animals and plants It presents and discusses ways

for imitating various nature inspired structural features and their functional properties such as hierarchical interlocked porous and bristle like structures and hetero layered brick and mortar structures It also highlights the utility of these structures and their properties for sensing functions which include static coloration self cleaning adhesive underwater navigation and object detection electric charge generation and sensitive olfactory functions for detecting various substances This is followed by an appraisal of accumulating knowledge and its translation from the laboratory to the point of care phase using selective sensors as well as desktop and wearable artificial sensing devices for example electronic noses and electronic skins in conjunction with AI assisted data processing and decision making in the targeted field of application In addition the book offers an insight into the challenges of continuing the development of nature inspired smart sensing and biosensing technology and their wider availability which can be substantially improved It is a valuable reference for graduates undergraduates researchers and working professionals in the fields of chemistry materials science and biomedical and environmental science Discusses the current strategies for fabricating nature derived bio chemical sensors Presents ways to apply nature derived bio chemical sensors in real life Describes the future of nature derived bio chemical sensors Energy: a Continuing Bibliography with Indexes, 1980 **Current Trends in International Fusion Research** Charles D.
