Postclassical Greek and Septuagint Lexicography

William A. Ross, 2022-03-25 0A long standing tradition within biblical scholarship sets the Greek text of the Septuagint constantly in relationship with its supposed Hebrew or Aramaic Vorlage examining the two together in terms of their grammatical alignment as a standard Yet another tradition frames the discussion in different terms preferring instead to address the Septuagint first of all in light of its contemporary Greek linguistic environment and only then attempting to describe its language and style as a text It is this latter approach that William A Ross employs in this textually based study of the Greek versions of Judges a so called double text in the textual history of the Septuagint The results of his study offer a window into the Old Greek translation and its later revision two distinct stages of Greek Judges with numerous instances of divergent vocabulary choices that reflect deliberateness in both the original selection and the subsequent change within the textual development of the book Ross s study illustrates the practicalities and payoff of a Greek oriented lexicographical method that situates the language of the Septuagint squarely within its contemporary historical and linguistic context
