The Online Teaching Survival Guide Judith V. Boettcher, Rita-Marie Conrad, 2010-05-13 The Online Teaching Survival Guide offers faculty a wide array of theory based techniques designed for online teaching and technology enhanced courses. Written by two pioneers in distance education this guidebook presents practical instructional strategies spread out over a four phase timeline that covers the lifespan of a course. The book includes information on a range of topics such as course management, social presence, community building and assessment. Based on traditional pedagogical theory, The Online Teaching Survival Guide integrates the latest research in cognitive processing and learning outcomes. Faculty with little knowledge of educational theory and those well versed in pedagogy will find this resource essential for developing their online teaching skills. Praise for The Online Teaching Survival Guide: At a time when resources for training faculty to teach online are scarce, Judith Boettcher and Rita Marie Conrad have presented a must read for all instructors new to online teaching. By tying best practices to the natural rhythms of a course as it unfolds, instructors will know what to do when and what to expect. The book is a life raft in what can be perceived as turbulent and uncharted waters. Rena M Palloff and Keith Pratt, program directors and faculty, Teaching in the Virtual Classroom Program, Fielding Graduate University. Developed from years of experience supporting online faculty, Judith Boettcher and Rita Marie Conrad's book provides practical tips and checklists that should especially help those new to online teaching hit the ground running. Karen Swan Stukel, Distinguished Professor of Educational Leadership, University of Illinois Springfield. This book blends a fine synthesis of research findings with plenty of practical advice. This book should be especially valuable for faculty teaching their first or second course online. But any instructor, no matter how experienced, is likely to find valuable insights and techniques. Stephen C Ehrmann, director, Flashlight Program for the Study and Improvement of Educational Uses of Technology, vice president, The Teaching, Learning and Technology Group. **Educational Principles and Practice in Veterinary Medicine** Katherine Fogelberg, 2024-01-31 Educational Principles and Practice in Veterinary Medicine: An in depth veterinary centered reference to the discipline of education. Educational Principles and Practice in Veterinary Medicine provides a detailed comprehensive reference to the discipline of education both broadly and as it relates to veterinary medicine. Written for veterinary faculty members, instructors and educators in other health professions, the book offers an in depth examination of knowledge and skills related to veterinary education. It discusses educational theory, how people learn, the structure and function of higher education and educational technologies among many other topics of importance. Sections cover educational leadership, professional development for faculty, research methods and study design, administration, outcomes and assessment, accreditation and the roles of the professional program instructor. Educational Principles and Practice in Veterinary Medicine Provides a detailed exposition to the discipline of education encompassing both theory and practice. Covers essential topics such as educational theory, the structure and function of higher education and educational technologies, all tailored to veterinary education. Acts

as a reference to education related knowledge and skills with an emphasis on how these topics relate to veterinary medicine Supports veterinary faculty and instructors interested in taking their knowledge and skills to the next level Educational Principles and Practice in Veterinary Medicine offers veterinary faculty and instructors a complete resource for understanding the field of education and improving their skills and knowledge Teach Math Like This, Not Like That Matthew L. Beyranevand,2017-05-24 Teaching mathematics is one of the most difficult and important jobs that anyone can do Mathematics is a critical part of education and an essential building block for problem solving skills that are needed in the real world However many students struggle to learn and understand mathematical concepts and educators need to do everything possible to help our students learn This book focuses on four areas necessary to be an impactful teacher of mathematics Planning Pedagogy Assessment and Relationships For each of the ideas presented in the book a brief introduction will be shared and then two different perspectives will be detailed with examples The first is Not like This which is often the traditional way of teaching mathematics or the less effective approach The second perspective is Teach Like This which is my recommended approach based upon research and my own experience as a teacher math coordinator and graduate instructor of math education Student Success Frederic W. Skoglund,Judy Ness,2011-06-16 This book is about moving from the conceptual to practical applications that impact the day to day teaching and learning processes Skoglund and Ness give School leaders all the tools that are necessary to change the culture of a school improve teacher performance and elevate student achievement Each component of the process is clearly addressed The authors provide critical documents such as an academic mission core commitments instructional calendars common assessments data charts error analysis forms and meeting agendas The Continuous Improvement System differs from other improvement efforts in that it views the school as an integrated whole and not a group of parts that are to be independently addressed This common sense approach has been welcomed by administrators and teachers alike Electrical Review ,1886 **Designing World Language Curriculum for Intercultural Communicative Competence** Jennifer Eddy,2022-06-16 This book creatively redefines how teacher educators and faculty in secondary and post secondary language education can become designers with intercultural education in mind The author aligns theoretical frameworks with practical features for revising the modern language curriculum via themes and novel tasks that transfer language learning from classroom to community developing communicative competence for mediation and learner autonomy along the way For novice and experienced instructors alike this book empowers them to design curriculum from transferable concepts that are worthy of understanding and have value within the culture s and to the learner develop assessments that ask the learner to solve problems and create products that transfer concepts or address needs of various audiences that they will encounter in community life and work direct language learners through a spiral articulated program that supports academic career and personal goals Pedagogical features include a glossary of key terms research to practice boxes scaffolded design tasks reflection questions and template samples
