Proceedings of the 2024 5th International Conference on Big Data and Informatization Education (ICBDIE 2024) Miao Yu, Kannimuthu Subramaniam, Mohammad Akour, Hafizoah Kassim, 2024-05-07 This is an open access book Big data is a large scale and complex data set based on modern information technology It has the characteristics of scale and

diversity and its information processing and storage capabilities have been significantly improved. The application of big data technology is to fully mine and analyze data, build cooperation and interaction between teachers and students, encourage students to communicate and interact with teachers, and give full play to the education and teaching effect of big data. In order to improve teaching quality and efficiency as much as possible, all kinds of teaching in the new era must have strong flexibility and foresight so as to adapt to the development of modern society. So big data will give greater flexibility to educational activities. Therefore big data will give greater flexibility to educational activities and more and more scholars provide new ideas for the above research directions. To sum up, we will hold an international academic conference on big data and information education. The 2024 5th International Conference on Big Data and Informatization Education ICB DIE 2024 will be held on January 19-21, 2024 in Sanya, China. ICB DIE 2024 is to bring together innovative academics and industrial experts in the field of Big Data and Informatization Education to a common forum. The primary goal of the conference is to promote research and developmental activities in Big Data and Informatization Education, and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in international conference on Big Data and Informatization Education and related areas.

Blended Online Learning and Instructional Design for TPACK: Emerging Research and Opportunities Niess, Margaret L., 2019-06-14. The explosion of digital technologies in the 21st century provided access to multiple robust inquiry, communication, and collaboration applications. The enhanced capabilities provide educational opportunities for engaging students in deeper and more thoughtful learning. Implementation of knowledge building communities in educational experiences, however, requires new pedagogical strategies that are vastly different from the predominant teacher-directed pedagogies of the 20th century. Today's teachers now must identify, orchestrate, and manage activities in their content areas in ways that successfully support students through activities such as engagement in knowledge building communities. Blended Online Learning and Instructional Design for TPACK: Emerging Research and Opportunities is an essential research publication that examines the implementation of knowledge building communities in educational experiences and pedagogical strategies that encourage engagement. Highlighting topics such as active participation, digital technologies, and online learning, this book is geared toward educators, educational designers, researchers, administrators, and academicians.

Comparing the Volumetric and Mechanical Properties of Laboratory and Field Specimens of Asphalt Concrete

Louay Nadhim Mohammad, Mostafa Elseifi, Samuel B. Cooper (III), Charles S. Hughes, Joe W. Button, Ervin L. Dukatz (Jr.), Ervin L. Dukatz (Jr), 2016 This reports document research that was performed to 1 determine causes of variability and tolerances for volumetric and mechanical properties of dense graded asphalt mixtures measured within and among the three specimen types and 2 propose a practice for state departments of transportation to incorporate these results in specifications and criteria for quality assurance mix design verification or validation and structural design and forensic studies The research was conducted in two phases In Phase I datasets of laboratory and field test data were collected and pooled in a meta analysis in an attempt to determine levels of variability in asphalt mixtures and the factors causing variability among and between the three specimen types Despite the inclusion of 25 extensive datasets representing roughly 8 000 individual mixtures in the meta analysis the results of the analysis were inconclusive Phase II was then undertaken a program testing specimens from paving projects across the United States to quantify the effects of process based factors on the variability of volumetric and mechanical properties of the specimen types The key outcome of the research is a proposed practice for evaluating the cause and magnitude of variability within and among the three specimen types In addition tolerances of volumetric and conversion factors between the three specimen types of mechanical properties evaluated are proposed based on the average difference between specimen comparisons for the mixtures evaluated in Phase II Agencies may use these proposed values to evaluate and adjust their current tolerances
