Endocrine Regulation and Physiological Adaptation of Stress Response in Aquatic Organisms, Volume II Yiming Li,Marco António Campinho, Yi-Feng Li, Juan Fuentes,2025-01-07 Organismal growth is a multi gene regulatory process that integrates various physiological signaling pathways in vivo from energy metabolism to somatic growth In fully developed animals endocrine regulation assures that homeostasis and growth can adapt the organism to changing environmental and biological conditions thus being the central regulatory hub for physiological responses Much attention has been paid to the endocrine regulation of aquatic organism growth and regulation These endocrine systems include neuroendocrine and insulin like growth factors and their downstream molecules Many signaling molecules promote tissue growth and regulate the metabolism of many nutrients in vivo Like other animals aquatic animals respond to environmental stimuli through endocrine regulation that modulates physiological and environmental responses Environmental stressors can affect aquatic ecosystems and their inhabitants including but not limited to temperature hypoxia salinity heavy metal nanomaterials pesticides microplastics and other toxic pollutants The presence of stress disrupts the homeostasis of aquatic animals inducing physiological molecular and behavioral changes Research into the endocrine regulation and physiological adaptation in aquatic organisms and the molecular mechanisms involved can aid in forecasting danger and assessing physiological well being That has never been more present than now amid climate change where aquatic environments are amongst the most susceptible biomes This research topic addresses these emergent questions by inviting studies investigating and discussing the molecular and cellular mechanisms of endocrine regulation and physiological adaptation in aquatic organisms to environmental stresses Gaining an insight into the current knowledge of these responses and the related mechanisms will give us a deeper understanding of aquatic animal biology and adaptation

Emma Dalhuijsen,Eva Gutierrez,Tatsiana Kliatskova,Rachel Mok,Martijn Gert Jan Regelink,2023-01-12 National Development Financial Institutions NDFIs are crucial in mobilizing financing including from private sector to reach countries climate and environmental C E objectives NDFIs often state owned FIs with a socioeconomic objective hold close to 19 trillion in assets and represent more than 10 percent of global investments annually When adequately managed they can address market failures and create new markets At the same time NDFIs need to manage the C E risks present to their investment and lending operations This report takes stock of the current trends and recommends policy actions for greening NDFIs distilling

insights from a survey of 22 NDFIs with broad geographical and income level coverage as well as in depth case studies of 4 NDFIs The report recommends that NDFIs introduce governance arrangements and formulate a strategy that is aligned with country C E goals and includes quantitative green finance targets NDFIs need to mobilize private capital through the development of bankable projects using technical assistance market education standardization of procedures and the creation of project preparation facilities They should use blended finance and pilot and scale up innovative green instruments At the same time NDFIs should adopt a comprehensive C E risk management framework covering potential environmental and climate risks generated by the institutions as well as financial risks to their balance sheets arising from C E factors Exposure assessments and stress testing would help better understand the impact and materiality of C E financial risks on NDFI portfolios and inform internal capital and liquidity adequacy assessment processes Finally NDFIs should enhance their C E disclosure and reporting practices in line with guidance from the Task Force on Climate Related Financial Disclosures TCFD as well as forthcoming disclosure guidance from the International Sustainability Standards Board ISSB As NDFIs scale up C E operations it is also essential to enhance their general efficiency and effectiveness by ensuring that they are effectively managed and properly supervised

Fulfilling the Sustainable Development Goals Narinder Kakar, Vesselin Popovski, Nicholas A. Robinson, 2021-08-30 This book contains assessment of the progress or the lack of it in implementing the UN Sustainable Development Goals SDGs Through review of the assessments and of case studies readers can draw lessons from the actions that could work to positively address the goals The 2030 Agenda for Sustainable

Development is designed to catalyze action in critical areas of importance to humanity and the planet. The effort to implement the SDGs however demands a sense of urgency in the face of environmental degradation, climate change, emerging conflicts and growing inequality among a number of other socio-economic problems. Five years after the launch of the 2030 Agenda, this book takes stock of how far the world has come and how we can position ourselves to achieve the global targets. The book is one of the first to assess how the implementation is impeded by the onset of COVID-19. It contains a special chapter on COVID-19 and the SDGs while many thematic chapters on different SDGs also assess how COVID-19 adversely affects implementation and what measures could be taken to minimize the adverse effects. This publication thus provides a fresh look at implementation of the SDGs highlighting impactful and creative actions that go beyond the business as usual development efforts. The volume reinforces this analysis with expert recommendations on how to support implementation efforts and achieve the SDGs through international and national strategies and the involvement of both the public and private sectors. The result is an indispensable textual tool for policy makers, academia, intergovernmental organizations (IGOs) and non-governmental organizations (NGOs) as well as the public as we march toward the 2030 deadline. **The Indian Economy @**
