Tastes Like Chicken Emelyn Rude, 2016-08-02 From the domestication of the bird nearly ten thousand years ago to its current status as our go to meat the history of this seemingly commonplace bird is anything but ordinary How did chicken achieve the culinary ubiquity it enjoys today It s hard to imagine but there was a point in history not terribly long ago that individual people each consumed less than ten pounds of chicken per year Today those numbers are strikingly different we consumer nearly twenty five times as much chicken as our great grandparents did Collectively Americans devour 73 1 million pounds of chicken in a day close to 8 6 billion birds per year How did chicken rise from near invisibility to being in seemingly every pot as per Herbert Hoover s famous promise Emelyn Rude explores this fascinating phenomenon in *Tastes Like Chicken* With meticulous research Rude details the ascendancy of chicken from its humble origins to its centrality on grocery store shelves and in restaurants and kitchens Along the way she reveals startling key points in its history such as the moment it was first stuffed and roasted by the Romans how the ancients obsession with cockfighting helped the animal reach Western Europe and how slavery contributed to the ubiquity of fried chicken today In the spirit of Mark Kurlansky s *Cod* and Bee Wilson s *Consider the Fork* *Tastes Like Chicken* is a fascinating clever and surprising discourse on one of America s favorite foods

Dark Matter of the Mind Daniel L. Everett, 2016-11-15 From a linguist and anthropologist a fascinating argument about culture cognition and the concept of human nature Choice Is it in our nature to be altruistic or evil to make art use tools or create language Is it in our nature to think in any particular way For Daniel L. Everett the answer is a resounding no it isn't in our nature to do any of these things because human nature does not exist at least not as we usually think of it Flying in the face of major trends in evolutionary psychology and related fields he offers a provocative and compelling argument in this book that the only thing humans are hardwired for is freedom freedom from evolutionary

instinct and freedom to adapt to a variety of environmental and cultural contexts Everett sketches a blank slate picture of human cognition that focuses not on what is in the mind but rather what the mind is in namely culture He draws on years of field research among the Amazonian people of the Pirah in order to carefully scrutinize various theories of cognitive instinct including Noam Chomsky s foundational concept of universal grammar Freud s notions of unconscious forces Adolf Bastian s psychic unity of mankind and works on massive modularity by evolutionary psychologists such as Leda Cosmides John Tooby Jerry Fodor and Steven Pinker Illuminating unique characteristics of the Pirah language he demonstrates just how differently various cultures can make us think and how vital culture is to our cognitive flexibility Outlining the ways culture and individual psychology operate symbiotically he posits a Buddhist like conception of the cultural self as a set of experiences united by various apperceptions episodic memories ranked values knowledge structures and social roles and not in any shape or form biological instinct The result is fascinating portrait of the dark matter of the mind one that shows that our greatest evolutionary adaptation is adaptability itself
