Recent Advances in Geomicrobiology of the Ocean Crust Beth N. Orcutt, Jason B. Sylvan, Cara M. Santelli, 2017-09-29 Igneous oceanic crust is one of the largest potential habitats for life on earth and microbial activity supported by rock water microbe reactions in this environment can impact global biogeochemical cycles However our understanding of the microbiology of this system especially the subsurface deep biosphere component of it has traditionally been limited by sample availability and quality Over the past decade several major international programs such as the Center for Dark Energy Biosphere Investigations the current International Ocean Discovery Program and its predecessor Integrated Ocean Drilling Program and the Deep Carbon Observatory have focused on advancing our understanding of life in this cryptic yet globally relevant biosphere Additionally many field and laboratory research programs are examining hydrothermal vent systems a seafloor expression of seawater that has been thermally and chemically altered in subsurface crust and the microbial communities supported by these mineral rich fluids *The Frontiers in Microbiology* 3 September 2017 *Recent Advances in Geomicrobiology of the Ocean Crust* papers in this special issue bring together recent

discoveries of microbial presence diversity and activity in these dynamic ocean environments Cumulatively the articles in this special issue serve as a tribute to the late Dr Katrina J Edwards who was a pioneer and profound champion of studying microbes that rust the crust This special issue volume serves as a foundation for the continued exploration of the subsurface ocean crust deep biosphere *Excessive Internet Use and its Impact on Mental Health* Aleksandar Višnjić, Miodrag Stankovic , Zorica Terzic-Supic, Kıvanç Kök , Omer Atac, 2024-09-18 The various forms of internet use including social networking online shopping gambling and gaming are a product of the time in which we live and represent an integral part of how we conduct and engage in social interaction Internet platforms are used daily providing people with the ability to connect and efficiently exchange important information as well as provide educational functions and raise awareness support of problems faced by individuals and societies globally However excessive use of internet related content has shown a significant association with addictive behavior which could have serious repercussions on an individual s mental health Where it is generally accepted that a combination of biological psychological and social factors contributes to the pathophysiology of addiction the ongoing debate remains as to whether certain excessive behaviors should be classified as addictions including social networking addiction Although any internet related addiction is not specifically identified in the Diagnostic and Statistical Manual of Mental Disorders DSM 5 or International Classification of Diseases ICD 11 it shares a common underlying etiological framework with other substance or behavioral addictions
