Springboard Math Course Answer:

Springboard G. Richard Shell, 2014-04-29 Wharton professor Richard Shell created the Success Course to help his world class MBA students answer two questions that aren't as obvious as they seem: What for me is success and How will I achieve it. Based on that acclaimed course, *Springboard* shows how to assess the hidden influences of family, media, and culture on your beliefs about success. Then it helps you figure out your unique passions and capabilities so you can focus more on what gives meaning and excitement to your life and less on what you are supposed to want.

Transform Your Math Class Using Asset-Based Teaching for Grades 6-12 Michael D. Steele, Joleigh Honey, 2024-07-19 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset-based teaching. An asset-based perspective on math education means starting with what students already know instead of focusing on what's missing. This approach elevates student thinking and reasoning skills. In this way, educators acknowledge that all students bring prior experiences, strengths, talents, and resources to the learning process and can contribute meaningfully in an authentic learning environment. *Transform Your Math Class Using Asset-Based Teaching for Grades 6-12* provides insight into asset-based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics. In the book, Michael Steele and Joleigh Honey highlight the importance of using language, instructional routines, and systemic structure that positively impact student engagement, their math identity, and ultimately their outcomes. Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive, supportive, and empowering learning environments, this book introduces an asset-based perspective that focuses on students' strengths, assets, and potential to learn mathematics. Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset-based perspectives. Offers strategies for promoting a growth mindset in mathematics, encouraging productive struggle in math, and promoting equitable math instruction. Supports teachers in reflecting on their decisions, self-awareness, and self-management. Includes a companion online study guide to support teachers individually or as part of a professional learning community. Adopting asset-based perspectives is about movement over time, not about flipping.
