Private food law Bernd van der Meulen, 2023-09-04 Since the turn of the Millennium world wide initiatives from the private sector have turned the regulatory environment for food businesses upside down For the first time in legal literature this book analyses private law initiatives relating to the food chain often referred to as private voluntary standards or schemes Private standards are used to remedy flaws in legislation in order to reach higher levels of consumer protection than the ones chosen by the EU legislature and to manage risks and liability beyond the traditional limits of food businesses We see that litigation is no longer solely framed by legislative requirements but ever more by private standards such as GlobalGAP BRC IFS SQF and ISO These private standards incorporate public law requirements thus embedding them in contractual relations and exporting them beyond the jurisdiction of public legislators Other standards focus on corporate social responsibility or sustainability This book also addresses how private religious standards such as Kosher and Halal play a role in defining specific markets of growing importance It is noted that organic standards have found an interesting symbioses with public law Another development on this topic is that food businesses are inspected more often by private auditors than by public inspectors Effects in terms of receiving or being denied certification far outweigh public law sanctions In short private law has changed an entire legal infrastructure for the food sector It emerges as competing with the public law regulatory infrastructure This book is of interest to all who concern themselves with food law legislation and litigation and the evolving role of private standards on changing the landscape of food chains and innovation

Uses and Misuses of International Economic Law Moritz J. K. Blenk, 2022-09-12 Standardization is a classic form of rulemaking Nonetheless it is notoriously diffuse and gives rise to questions and debate in particular over the standards normativity legitimacy and nature whether public or private national or international Moritz J K Blenk applies a policy orientated approach to international law to comparatively analyze the role of private rulemaking within the context of international economic integration in the World Trade Organization and the European Union He thereby aims to elucidate the opaque phenomenon of private standardization from a legal perspective and more profoundly shed new light on economic integration

Cost-effective Management Tools for Ensuring Food Quality and Safety Pilar Santacoloma, Roberto Cuevas, 2011 Training courses based on this manual are designed to build the capacity of small and medium enterprises in the agro industrial sector in order to improve quality and safety management and to achieve greater competitiveness and sustainability over the long term Based on case studies carried out in Bolivia and El Salvador *Food Australia*, 2001 **Leaders and Laggards** Neil Gunningham, Darren Sinclair, 2017-09-08 Consensus is growing internationally that traditional command and control approaches to environmental regulation have borne much of their low hanging fruit Yet it is far from clear what should complement or replace them Regulatory agencies and policy makers are struggling with a lack of information about regulatory reform about what works and what doesn't and about how best to harness the resources of both government and non government stakeholders Progress is being impeded unnecessarily by a lack of shared knowledge of how similar agencies elsewhere are meeting similar challenges and by a lack of data on the success or otherwise of existing initiatives Despite recent and valuable attempts to deal with such problems in the European Union and North America these remain islands of wisdom in a sea of ignorance For example when it comes to dealing with small and medium sized enterprises very little is known and what is known is not effectively distilled and disseminated Much the same could be said about the roles of third parties commercial and non commercial as surrogate regulators and more broadly of many current initiatives to reconfigure the regulatory state Based on the authors work for the OECD Victorian Environmental Protection Authority and the Western Australian Department of Environment Protection **Leaders and Laggards** addresses these problems by identifying innovative regulatory best practice internationally in a number of specific contexts evaluating empirically the effectiveness of regulatory reform and providing policy prescriptions that would better enable agencies to fulfil their regulatory missions Focusing primarily on the differing requirements for both corporations and small and medium sized enterprises in North America and Europe the book aims to complement existing initiatives and to expand knowledge of regulatory reform by showing how existing experience can best be put to practical use on the ground by drawing lessons from experiments in innovative regulation internationally by reporting and extrapolating on original case studies and by advancing understanding on which instruments and strategies are likely to be of most value and why The authors argue that the development of theory has outstripped its application In essence **Leaders and Laggards** aims to ground a myriad of theory on the reinvention of environmental regulation into practice The book will be essential reading for environmental policy makers regulatory and other government officials responsible for policy design and implementation academics and postgraduate students in environmental management environmental law and environmental policy and a more general readership within environmental policy and management studies It will also be of interest to those in industry such as environmental managers and corporate strategists who are considering the use of more innovative environmental and regulatory strategies and to environmental NGOs **Fourth International Protea Working Group Symposium**

From Corporate Social Responsibility to Corporate Social Liability Anna Aseeva, 2021-05-20 This book provides a critical socio legal study that brings together the latest scholarly advances on corporate social responsibility and at the same time addresses the pressing issue of corporate liability for harmful acts across the supply and production chains Corporations have seldom been held responsible and virtually never liable for the acts of their subsidiaries and subcontractors Actors as different as workers investors individual consumers and shareholder activists claim that corporations should accept greater responsibility for communities and environments affected by their activities The book argues that a global value chain s head corporations remain immune to any liability because of the economically dependent legally independent relationships between core corporations and their periphery suppliers and subcontractors To tackle this problem globally the author acknowledges that we as a society need to reduce the economic dependence as described above which is far too excessive by ensuring a level playing field both economically and socially More concretely she argues that in order to realise transnational corporate liability we as lawyers need to find a way or ways to establish legally effective relationships between head corporations and their economically dependent entities Readers of this book will be able to export the concept of corporate social liability developed in the context of value chains and apply it to other contexts involving corporate activities where they need to tackle unrestrained corporate freedom and make global businesses responsible and socially useful
