San Miguel de Allende Lisa Pinley Covert, 2017-06 Struggling to free itself from a century of economic decline and stagnation the town of San Miguel de Allende nestled in the hills of central Mexico discovered that its timeless quality could provide a way forward While other Mexican towns pursued policies of industrialization San Miguel on the economic political and cultural margins of revolutionary Mexico worked to demonstrate that it preserved an authentic quality earning designation as a typical Mexican town by the Guanajuato state legislature in 1939 With the town's historic status guaranteed a coalition of local elites and transnational figures turned to an international solution tourism to revive San Miguel's economy and to reinforce its Mexican identity Lisa Pinley Covert examines how this once small quiet town became a UNESCO World Heritage Site and home to one of Mexico's largest foreign born populations By exploring the intersections of economic development and national identity formation in San Miguel she reveals how towns and cities in Mexico grappled with change over the course of the twentieth century Covert similarly identifies the historical context shaping the promise and perils of a shift from an agricultural to a service based economy In the process she demonstrates how San Miguel could be both typically Mexican and palpably foreign and how the histories behind each process were inextricably intertwined

Branded Nation James B. Twitchell, 2004-09-08 Branding says James Twitchell is nothing more than commercial storytelling brands are the stories that are associated with products For example the special taste of Evian says Twitchell is in the brand not the water Branding has become so successful so ubiquitous that even institutions that we thought were above branding antithetical to branding have succumbed Such cultural institutions as religion higher education and the art world have learned to love Madison Avenue or lose market share Of course most ministers university presidents and museum directors will insist that branding has nothing to do with them but as Twitchell brilliantly demonstrates in this witty insightful examination of three of our most important cultural institutions wherever supply exceeds demand branding follows The rise of the megachurch epitomizes branding in religion From its inception the megachurch was designed not to compete with other churches but to bring in the unchurched especially men worshippers who might otherwise be home watching television or strolling through the mall on a Sunday morning The megachurches have been phenomenally popular none more so than Willow Creek Community Church just south of Chicago one of the oldest megachurches which Twitchell analyzes in *Branded Nation* Colleges and universities have embraced branding as they have grown more alike Especially among the top schools in the country the student bodies the faculties often even the campuses themselves are practically interchangeable What distinguishes each school is the story it tells about itself Now every institution of higher learning has its image organizers its brand managers usually in the admissions or development offices whose job it is to make their institution seem different from all the rest Even museums with their multimillion dollar Monets have seen the advantages of branding The blockbuster exhibitions often put familiar paintings in a new context that is they provide a new narrative branding the art Museums keep expanding their stores placing them not just near the entrance on

the ground floor but throughout the museum in the galleries themselves Some museums such as the Guggenheim even franchise themselves turning the institution itself into a brand In short high culture is beginning to look more and more like the rest of our culture In perhaps his most subversive observation Twitchell doesn't condemn the branding of cultural institutions On the contrary he believes that branding may be invigorating our high culture bringing it to new audiences making it a more integral part of our lives Not since Bobos in Paradise has there been such a trenchant provocative analysis of our world

Cadets on Campus John A. Coulter, 2017-03-24 Since the founding of the United States Military Academy at West Point in 1802 more than eight hundred military schools have existed in this country The vast majority have closed their doors been absorbed into other educational institutions or otherwise faded away but others soldier on adapting to changing times and changing educational needs While many individual institutions have had their histories written or their stories told to date no single book has attempted to explore the full scope of the military school in American history Cadets on Campus is the first book to cover the origin history and culture of the nation's military schools secondary and collegiate and this breadth of coverage will appeal to historians and alumni alike Author John Alfred Coulter identifies several key figures who were pivotal to the formation of military education including Sylvanus Thayer the father of West Point and Alden Partridge the founder of the school later known as Norwich University the first private military school in the country He also reveals that military schools were present across the nation despite the conventional wisdom that most military schools and indeed the culture that surrounds them were limited to the South Coulter addresses the shuttering of military schools in the era after the Vietnam War and then notes a curious resurgence of interest in military education since the turn of the century
