Tyler, Susan E. Henninger, 2017-05-19 The Ultimate Guide to College Transfer is a comprehensive guide designed to make college transfer between four year schools as successful as possible Chapters outline the steps to take from the moment a student finds him herself considering college transfer to the first semester at his her next college The book contains vignettes based on real student stories and excerpts from interviews with transfer students parents and higher education professionals The information and advice they share will be helpful informative and reassuring to families going through a college transfer and enlightening to high school and college personnel College transfer when done for the right reasons and in the right way can be an extremely positive experience for students This is especially true when the student goes from merely surviving in their old environment to thriving in their new one *Breaking Barriers* Stanley S. Litow, Tina Kelley, 2021 Breaking Barriers shows how to redesign high schools so that all students can move on to college and successful careers In a negation of the American Dream a child s zip code is currently a far better predictor of success than hard work intelligence or resilience This book tells the story of a school model that focuses on equity and works to prove that all young people can achieve academic excellence given the right support P TECH Pathways in Technology Early College High School combines public high schools and community colleges in partnership with employers providing both opportunity and support for all students This innovative and effective approach eliminates barriers to replication by engaging all stakeholders The first P TECH which opened in a low income Brooklyn neighborhood is now a model for school reform Praised by President Obama and heads of nations its story is told through the voices of students who have shattered the myths about which students can succeed Breaking Barriers is a compelling read It shows that a clear pathway from school to college to career goes beyond an aspiration it s achievable and for all students The global success of P Tech schools is something education government and business leaders need to learn about and get behind Arne Duncan former United States Secretary of Education Breaking Barriers is a must read The P Tech story shows that quality schools leading to not just a high school diploma but college completion and career success are critical to our future This is the kind of opportunity and support that must be provided to all students regardless of income or race Darren Walker president Ford Foundation The Oxford Handbook of Higher Education in the Asia-Pacific Region Devesh Kapur, Lily Kong, Florence Lo, David M. Malone, 2023-01-11 Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID 19 pandemic Asia Pacific s share of the world s Gross Domestic Product GDP doubled from 15 per cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the

world's population and three of the world's five largest economies Asia is soon poised to home half of the world's middle class a class that is both the driver and the product of higher education The quality of a country's system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects It is therefore natural that the putative Asian Century should generate interest in the region's higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among male students and business degrees while at the same time are also highly differentiated not only across countries but also within As such a better understanding of higher education achievements failings potential and structural limitations in the Asia Pacific Region is imperative This handbook presents a number of significant country case studies and documents cross cutting trends relating to among other things the trilemma faced by governments juggling competing claims of access accessible cost and quality the balance between teaching and research the links between labour markets demand and higher education supply preferred fields of study and their consequences the rise of the research university in Asia the lure of institutions of international reputation within the region new education technologies and their effects and trends in government policy within the wider region and sub regions

Poison Ivy Evan Mandery, 2025-03-18 Hailed as a staggering portrait of inequality in America Philip Dray *Poison Ivy* tells the bigger seedier story of how elite colleges create paths to admission available only to the wealthy despite rhetoric to the contrary In a lively and trenchant Washington Monthly account Evan Mandery a Harvard graduate and current professor at a public college that serves low and middle income students reveals how tacit agreements between exclusive Ivy plus schools and white affluent suburbs create widespread de facto segregation And as a college degree continues to be the surest route to upward mobility the inequality bred in our broken higher education system is now a principal driver of skyrocketing income inequality Mandery contrasts the lip service paid to opportunity by so many elite colleges and universities with schools that actually walk the walk Now in an accessible paperback format *Poison Ivy* is a no holds barred takedown Forbes that synthesizes fascinating insider information on everything from how students are evaluated unfair tax breaks and questionable fundraising practices to suburban rituals testing tutoring tuition schemes and more This bold provocative indictment of America's elite colleges shows us exactly what's at stake and what will be possible if we muster the collective will to transform it
