

CHAPTER 5

Coordinate Geometry

The Cartesian coordinate system specifies the location of any point on a plane using an ordered pair of numbers (x, y) , also known as coordinates. The invention of the Cartesian coordinate system by René Descartes was said to be one of the greatest mathematical achievements. His invention made it possible to relate geometrical objects such as points, lines, curves, and shapes, to algebraic expressions and equations. This "marriage" between algebra and geometry is a classic example of how mathematicians have developed new and powerful ideas by connecting different concepts in mathematics. In this chapter, we will begin to relate some of the geometrical objects to algebraic expressions and equations through the seemingly simple **notation** of the coordinate system.

Learning Outcomes

What will we learn in this chapter?

- How to find the length and the midpoint of a line segment given the coordinates of its endpoints
- How to find the gradient of a straight line given the coordinates of two points on it, or given that it is parallel or perpendicular to a given line
- How to interpret and find the equation of a straight line graph in the form $y = mx + c$
- How to solve geometry problems involving the use of coordinates

Uscmp Geaometry Teacher Editions

Michael Brown

Uscmp Geaometry Teacher Editions:

When somebody should go to the book stores, search introduction by shop, shelf by shelf, it is in fact problematic. This is why we provide the ebook compilations in this website. It will unquestionably ease you to look guide **Uscmp Geaometry Teacher Editions** as you such as.

By searching the title, publisher, or authors of guide you in fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best place within net connections. If you take aim to download and install the Uscmp Geaometry Teacher Editions, it is very easy then, back currently we extend the partner to buy and create bargains to download and install Uscmp Geaometry Teacher Editions correspondingly simple!
