

This air conditioner uses new refrigerant HFC (R410A).

- (1) **Refrigerant** may circulate in a tandem in the following manner:
 - (a) The refrigerant in the condenser of conventional refrigerant(R22) model will, some of the piping and installation and service tools, or special (like the kable surface) (2) especially, when replacing a conventional refrigerant(R22) model with a new refrigerant (R404A) model, always replace the conventional piping and flare nuts with the R404A piping and flare nuts.
- (2) **Refrigerant** that uses refrigerant (R404A) have a different charging port thread diameter to prevent excessive charging with conventional refrigerant(R22) and for safety. Therefore, a check must be made to see if the thread diameter of the charging port is correct.
- (3) **The more careful** that foreign matter (oil, water, etc.) does not enter the piping than with refrigerant(R22) models. Also, when storing the piping, securely seal the opening by pinching.
- (4) **When changing** the multistage, take into account the slight change in the composition of the gas and liquid phases, and always change from the liquid phase side when composition

(b) It is necessary to use seamless copper pipes and it is also noted that the amount of residual oil is less than 40 mg/10m. We must use copper pipes having a collapse, deformation or dimensional position (especially on the inner surface). Other alloys, the degradation value or sagging value may become

76) Do not use the existing fan (RHS) piping and have note:
 a. When installing the new condenser, the pressure inside the refrigerant cycle will rise and cause leakage. Inputs will cause the operator to fill the condenser.
 b. When installing and evacuating the air conditioning, do not use gases other than the specified refrigerant (R134a) to seal the refrigerant cycle.
 c. If air or other gas enters the refrigerant cycle, the pressure inside the cycle will reach an abnormally high value.

Install all in place that can withstand the weight of the subject and outdoor soils and install positively so that the units will not topple or fail.

(7) The best method to achieve these is the design of cost-effective, innovative, new buildings.

- (2) If children under 10 years old may approach the unit, take preventive measures to that they do not reach the unit.
- (3) Install the fence all on the wall where the height of the fence is 1.2m or more.

- 123 Put the main air conditioner in separate buildings, if it is not suitable for this installation manual.
- 124 Connect the indoor unit and outdoor unit with the air conditioning piping, and make suitable standards parts.
- 125 This installation manual describes the correct connections using the standard accessories and the parts specified in this installation manual.
- 126 See the installation work done by authorized service personnel only.
- 127 Remove and the power cord, lengthen or shorten the cord, or change the plug.
- 128 Also do not use an extension cord.
- 129 Plug in the power cord plug firmly. If the receptacle is loose, repeat it (after cutting the main air conditioner).
- 130 Do not turn on the power until all installation work is complete.
