Ghesquière, A. J. J. M. Ruijsenaars, 2005 Research on learning disabilities has known a tremendous growth the last 25 years Yet despite the progress that is made in diverse domains learning disabilities still stay a serious challenge to teaching and instruction In this book the authors try to link original research findings on learning disabilities with instructional methods and teaching practices The first part of the book brings together contributions about the cognitive metacognitive and socio emotional correlates of learning disabilities These factors generally form a core aspect of the challenge of learning disabilities to teaching and instruction The first three chapters concern the phenomenon of dyslexia Van den Broeck critically evaluates the disputable role of intelligence in the concept and definition of dyslexia Hutchinson Whiteley and Smith explore the role of cognitive linguistic skills in the early identification of reading problems in emergent bilingual children Van Ingelghem and colleagues study auditory temporal processing in children with dyslexia In chapter 4 Desoete and Roeyers summarize their research on metacognition in children with mathematics learning disabilities Finally Gadeyne Ghesquière and Onghena explore the relationship between academic achievement and behaviour problems The second part of this book goes deeper into research on intervention and instruction methods The first three chapters focus on reading problems Whitely and her colleagues try to analyze why some children do not benefit from early phonologically based interventions leading to implications for the development of early screening tools and intervention schemes for these non beneficiaries Van Kraenoord Rohl and Rivalland report findings of an Australian study examining the programs and strategies used to teach and intervene in Australian classrooms for students with learning problems Bouwer and Jordaan argue for the use of imaging as a learning support technique for children with dyslexia The last two chapters explore the differential effect of direct and guided instruction for children with arithmetic learning problems Kroesbergen and Van Luit focus on the acquisition and use of multiplication strategies Milo and Ruijsenaars do the same for addition and subtraction up to 100 After reading this book not all challenges of learning disabilities to teaching and instruction will be tackled But it surely can offer some contribution in getting away from some of them The authors hope it gives a lot of inspiration to the diverse audience we had in mind practitioners as well as researchers of different disciplines

Creative Strategy Chris Bilton, Stephen Cummings, 2010-04-26. People tend to think of creativity and strategy as opposites. This book argues that they are far more similar than we might expect. More than this, actively aligning creative and strategic thinking in any enterprise can enable more effective innovation, entrepreneurship, leadership and organizing for the future. By considering strategy as a creative process and vice versa, the authors define creative strategy as a mindset which switches between opposing processes and characteristics and which drives every aspect of the business. The authors draw experiences and cases from across this false divide from the music industry, sports, fashion, Shakespearean theatre, companies, creative and media organizations and dance as well as what we might regard as more mundane providers of mainstream products and services to uncover the creative connections behind successful strategy. Creative Strategy is a talisman for those looking to take a new path.

Matt Hardisty, Strategy Director, Mother Advertising. It has been said that business is a hybrid of dancing and calculation: the former incorporating the creative within a firm, the latter the strategic. Bilton and Cummings show how these apparently contradictory processes can be integrated. Their insights about how firms can create to strategize and strategize to create are informative for managers and management scholars alike.

Jay Barney, Professor and Chase Chair of Strategic Management, Fisher College of Business, The Ohio State University. In today's world, new thinking, creativity is required to tackle long standing problems or address new opportunities. The trouble is few organizations understand how to foster and apply creativity at least in any consistent manner. This book provides new insights into just how that can be done. It moves creativity from being just the occasional and fortuitous flash of inspiration to being an embedded feature of the way the organization is run.

Sir George Cox, Author of the Cox Review of Creativity in Business for HM Govt, Past Chair of the Design Council.
