Weekly World News ,1985-03-26 Rooted in the creative success of over 30 years of supermarket

tabloid publishing the Weekly World News has been the world's only reliable news source since 1979. The online hub www.weeklyworldnews.com is a leading entertainment news site. Resources in Education, 1987. *Mass Communication* Tyler Miller, 2019-04-09. Mass Communication has taken deep roots in the world. Mass communication research is a sprawling and multidisciplinary field of research approaches and theories drawing inspiration from a range of disciplines in the humanities and the social sciences and even from science disciplines such as mathematics, computing and engineering. It continually develops and adapts to the changing nature and application of media technologies as well as changing political and social concerns with the media. It influences almost all the aspects of human life viz. medical education, culture, tradition and fashion etc. Like all other subjects, mass communication also is worthy of research so that it can develop in a more understandable form. This book presents an epistemological view of levels of analysis. It guides the readers to understanding the challenges of media measurement, its quantification, datafication and assessment and helps in developing skills of media audience analysis. A comparative analysis is also made as where required. The author is hopeful that this book will be very useful to those who have a flair of learning more about the mass communication. Mega-regionalism and Great Power Geo-economic Competition Xianbai Ji, 2021-09-22. The regional trade governance architecture is in flux. The latest wave of regionalism in the form of mega regional trade partnerships between countries with major shares of the world economy occurred in the aftermath of the Global Financial Crisis of 2008-09. The most systematically important mega FTAs included the Trans Pacific Partnership led by the United States, US, the China-backed Regional Comprehensive Economic Partnership and the Transatlantic Trade and Investment Partnership between the European Union, EU and the US. Drawing on policy diffusion and competitive regionalism literatures, Xianbai Ji develops an innovative model of competitive spill over to uncover the historical and contemporary sources of mega regionalism resulting from a temporal clustering of mega FTA initiatives from great powers. In the book, mega FTA is conceptualised as an instrument of geo-economic competition between the US, China and the EU. Each aspired to leverage its mega FTA to gain an edge over its rivals in economic, geopolitical and legal terms. Through a mix method research strategy involving computable general equilibrium modelling, game theory, desk research and perception survey, Ji generates an impressive chorus of quantitative, qualitative and perceptual data demonstrating that the rise of mega regionalism was driven by the multidimensional competition between the US, China and the EU over international economic benefits, geopolitical influence and the authority to write rules governing emerging trade issues. This book will attract academics, think tankers, practitioners and postgraduate students interested in regionalism, international trade, international political economy, applied trade policy analysis, great power competition, geo-economics and international relations. **War on Terrorism** Alan O'Day, 2017-09-08. President George W. Bush maintained in his address of 20 September 2001 that the successful prosecution of the war against terrorism will require the judicious use of every resource at our command, every means of diplomacy, every tool of intelligence, every instrument of law enforcement, every financial

influence and every necessary weapon of war Unlike the Cold War the War on Terrorism is neither a battle against some ideology nor bounded by physical boundaries or conventional political units such as nation states The War on Terrorism is the internationalisation or rather globalisation of previous wars Terror is not a nation and the enemies in such wars are not nations any regime such as Libya simply by repudiating terrorism can become an ally of the anti terror coalition Regimes that continue to practice terrorism against domestic opponents qualify to participate in the wider war if they conform to certain norms in external affairs The 28 articles reprinted here consider aspects of that most amorphous of animals the War on Terrorism They do not set out to provide all of the answers nor do they radiate a unified vision of what constitutes the war on terrorism the pieces begin from a range of political and intellectual outlooks Taken as a group however the difficulties of determining the limits and nature of the war on terrorism receive important attention The authors address several major themes within the war on terrorism what falls within its perimeters its shifting manifestations implications responses and future directions

China-India Military Confrontation: 21st Century Perspectives DR SUBHASH KAPILA, 2015-12-30 The China India military confrontation in the High Himalayas as a consequence of Chinas military occupation of Tibet in 1950 and the unprovoked Chinese invasion of India in end 1962 has in 2015 graduated from a boundary dispute to an intense geopolitical tussle in Asias geopolitical rivalries Tibet in realistic terms better and more precisely described as China Occupied Tibet has emerged as Chinas Core Issue and drives Chinas intractability in resolution of the China inflicted boundary dispute and territorial grab of large tracts of Indian Territory Though officially unstated but equally true Tibet is also a Core Issue for India strategically Tibet is civilisationally culturally and spiritually more closely linked to India than China The dimensions of China India military confrontation stand radically transformed in the 21st Century with the insertion of the nuclear and maritime dimensions diluting Chinas coercive capabilities against India The 21st Century is likely to witness an intense Cold War between China and India which most likely could be subsumed in the evolving Cold War II between China and the United States Contextually the United States can no longer afford to continue as passive spectator of the China India military confrontation in the 21st Century Evolving geopolitical compulsions and imperatives would ultimately force the United States to dispense with its strategic ambiguities on China and Pakistan and push the United States to stand by India in the intensifying China India military confrontation Such a game changer would ensure that the United States not only stands on the right side of history but also ensures the continued strategic embedment in Indo Pacific Asia of the United States with Indias strategic support Dr Subhash Kapila
