University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties *U.S. News and World Report* ,2007 U.S. News & World Report ,2008 **Sexual Assault on Campus** Tamara Rice Lave, 2022-07-07

Air University Review ,1976 Scandals in College Sports Shaun R. Harper, Jamel K. Donnor, 2017-02-03 Scandals in College Sports includes 21 classic and contemporary case studies and ethical dilemmas showcasing challenges that threatened the integrity and credibility of intercollegiate sports programs at a range of institutional types across the country Cases cover NCAA policy violations and ethical dilemmas involving student athletes coaches and other stakeholders including scandals of academic misconduct illegal recruiting practices sexual assault inappropriate sexual relationships hazing concussions and point shaving Each chapter author explores the details of the specific case presents the dilemma in a broader sociocultural context and ultimately offers an alternative ending to help guide future practice This timely book highlights the impact that sports have on institutions of higher education and guides college leaders and educators in informed discussions of policy and practice *Winnebagos on Wednesdays* Scott Cowen, 2018-02-20 Why a strong mission and inspired leadership are vital to the success of America s colleges and universities In 1998 soon after assuming the presidency of Tulane University Scott Cowen was confronted with a setback Despite an undefeated football season and putting the best financial deal on the table Cowen was unable to retain the school s football coach The coach wanted something the president didn t have a football program so popular as the coach put it that fans would line up their Winnebagos on Wednesdays in anticipation of Saturday games In that moment Cowen improbably found himself in the entertainment business and his university was deemed wanting At a time when schools seem overrun by sports programs spiraling costs and absurd ranking systems Winnebagos on Wednesdays argues that colleges and universities of all stripes and sizes can achieve their educational aims if they possess two things visionary leadership and a strong mission Cowen named one of the nation s top university presidents by Time magazine in 2009 gives a behind the scenes look at the critical

demands faced by many education leaders He profiles a range of situations from how Diana Natalicio of the University of Texas at El Paso expanded a school serving a specific demographic into an academic powerhouse to how Michael Sorrell shifted Paul Quinn College's mission to urban entrepreneurship in order to save the institution Cowen also draws from his own hard won experiences including the rebuilding of Tulane and New Orleans after Hurricane Katrina and the decision to maintain Tulane's football program He shows how crucial choices in tough situations shape organizations for better or ill A sweeping overview of the higher education landscape Winnebago on Wednesdays demonstrates that the courage of transformative leadership is essential for colleges and universities to remain vital *A Perfect Mess* David F.

Labaree, 2017-04-21 A history of higher education in America and an investigation into the secrets of its success *A Perfect Mess* should become a classic Times Higher Education Read about America's colleges and universities rising student debt affirmative action debates conflicts between faculty and administrators and it's clear that higher education in this country is a total mess But as David F Labaree reminds us in this book it's always been that way And that's exactly why it has become the most successful and sought after source of learning in the world Detailing American higher education's unusual struggle for survival in a free market that never guaranteed its place in society a fact that seemed to doom it in its early days in the nineteenth century he tells a lively story of the entrepreneurial spirit that drove American higher education to become the best And the best it is today America's universities and colleges produce the most scholarship earn the most Nobel prizes hold the largest endowments and attract the most esteemed students and scholars from around the world But this was not an inevitability In their early years weakly funded American schools had to rely on student tuition and alumni donations to survive This gave them tremendous autonomy to seek out sources of financial support and pursue unconventional opportunities As Labaree shows by striving mightily to meet social needs and fulfill individual ambitions they developed a broad base of political and financial support that grounded by large undergraduate programs allowed for the most cutting edge research and advanced graduate study ever conducted As a result American higher education eventually managed to combine a unique mix of the populist the practical and the elite in a single complex system The answers to today's problems in higher education are not easy but as this book shows they shouldn't be No single person or institution can determine higher education's future It is something that faculty administrators and students adapting to society's needs will determine together just as they have always done
