*The Encyclopedia of Best Films* Jay Robert Nash, 2019-10-23 This all inclusive A Z encyclopedia by

one of the world's foremost experts on cinema provides comprehensive annotations of the best films produced from 1914 on. The work offers more than 5,000 three to five star entries: three stars good, four stars excellent, five stars masterpiece, and yes, author Jay Robert Nash has viewed every single one of them as well as many more that did not make the cut. In addition to a precis, each film's entry also includes a listing of the cast as well as the key principles involved in production from the director to the hair stylist. Especially unique to this book is a rating system that helps parents determine whether or not a film is appropriate for their children. Unlike the industry rating system which can be influenced by studio lobbying, Nash objectively evaluates each film and confers upon it one of four recommendations: for viewing, recommended, acceptable, cautionary, and unacceptable. Backmatter includes a list of top films by genre, i.e. animated, drama, sports, mystery, adventure, etc., as well as an annotated name index listing all persons mentioned along with their dates of birth and death. Rounding out this essential volume for the film buff are over 500 still photos from the author's private collection.

**American Politics in Hollywood Film** Ian Scott, 2000. This is the first book to investigate Hollywood's treatment of American politics, politicians, and political institutions. The author explains the influence through creative, ideological, and financial means that Hollywood has on politics and vice versa. Key questions of agenda setting are addressed, as are the value-oriented frames of reference that Hollywood has helped shape in educating and directing the American public about politics and democracy. **American Politics in Hollywood Film** is structured thematically, introducing sub-genres of election films, political biographies, action, adventure, and thriller films. There is an overarching chronological pattern beginning in the 1930s and ending in the 1990s, allowing the reader to trace the progression of the genre. 25 black and white film stills are included.

**The Early Evolutionary Imagination** Emelie Jonsson, 2021-09-29. Darwinian evolution is an imaginative problem that has been passed down to us unsolved. It is our most powerful explanation of humanity's place in nature, but it is also more cognitively demanding and less emotionally satisfying than any myth. From the publication of the *Origin of Species* in 1859, evolution has pushed our capacity for storytelling into overdrive, sparking fairy tales, adventure stories, political allegories, utopias, dystopias, social realist novels, and existential meditations. Though this influence on literature has been widely studied, it has not been explained psychologically. This book argues for the adaptive function of storytelling, integrates traditional humanist scholarship with current knowledge about the evolved and adapted human mind, and calls for literary scholars to reframe their interpretation of the first authors who responded to Darwin.
