

The Importance of Using Animal for Animal Testing

Animal experimenters are trying to make us believe that those who they called "Science" in the name of tortured animals old habits once stopped, a lot of sick children and other patients, accident victims will be resigned to die. But in recent years, many important modern studies have shown that experiment animal is not a good sample of the study. Animal experiments are often no reason to sacrifice in the lives of animals, but also wasted a lot of valuable resources for the animals they have been infected with some kind of infection is almost never disease. Fortunately, a lot of cutting-edge technology and non-animal experiments to human health and animal brings a bright future.

Put a completely healthy individuals from different species, imprisoned in an unnatural environment full of pressure, artificially making it almost impossible for them to infect some kind of infection in the natural environment, disease, and as a sample to study human nature Environment infection diseases, such results make people skeptical. Different species in the physiological response to the drug is largely different. In addition, the laboratory animals showed a lot of typical behavior from extreme psychological pressure, the experimenter acknowledged that adoption of these animals under great pressure as a sample; the study data have a negative impact. "In our fight with cancer, animals played a big role."

As an example, in 1971 so far, the United States has invested nearly 200 billion dollars on cancer research. However, each year there are still more than 500,000 Americans die of cancer. From 1971 to the beginning of the war of cancer mortality increased by 73%. If the animal actually help cure cancer, then given our incremental investment in animal experiments, we should have already overcome cancer it!

In china, the only way to be used as the experimental animal control ordinances - Laboratory Animal Management Regulations - allows the animals to burn poison frightened isolated fasting artificially forced bondage of drug addiction and lead to brain damage. No matter how painful and cruel trivial experiments have not been prohibited - not even provide for the use of any analgesics. What is more, even in the alternative feasible, regulations did not require the method should be used instead; it is often still use animal experiments. Regulations During the experiment, the animals did not achieve the welfare of the protective effect - on the contrary, it is even if there is no refinement of the treatment of animals.

People clinical trials and epidemiological studies; research tools based on human tissues, cells, and in general; the sophisticated patient simulators and high simulation; and computer models are more reliable, more accurate, relatively low cost, compared to animal experiments it is also more humane. Some scientists have used advanced brain cells to develop a "micro-brain" model for cancer research, as well as artificial sk
