

Quick Reference Guide T4220 (Elavon)

What's in the box?:

UK Telephone Cable
Cable with RJ45 connector on one end and RJ11 connector on the other

OR

RJ45 Telephone Cable
Cable with RJ45 connector on both ends

T4220 terminal

Ethernet Cable **
Cable with RJ45 connectors on both ends

2x-IP3 IP30 Pin
Terminal with 2x IP30 pin

Documentation pack

Power Supply

*See contents that vary by retailer and package. **Ethernet cables are optional depending upon terminal model and cable configuration.

1. Connect the cables

DO NOT CONNECT ELECTRICAL SUPPLY UNTIL INSTRUCTED

- Remove the Cable Tidy by sliding it out as shown.
- Connect one end of the telephone cable to the **blue RJ45** port and the other end to an analogue telephone line wall socket.
- If an Ethernet cable has been included in the box and you wish to use a network, connect the network cable to the **white RJ45** port and the other end to a network connection point.
- It may help to bend the cable end slightly before attempting to insert it.

Important tips:

- If connecting to a broadband connection, ensure the terminal is connected to the line through a DSL filter.
- If connecting via Ethernet, ensure your firewall settings are set to allow the terminal to send and receive data over your network.
- Insert the Power Supply connector into the **red POWER** port in the 3-colour & position shown.
- Turn the cable anti-clockwise from the 5 o'clock to the 12 o'clock position to lock it in place.
- DO NOT** plug power supply into electrical wall socket.
- If you have a separate IP30 Pin (see IP30 Pin) connect it to the **yellow IP30 PIN** socket on the terminal.
- Reconnect all cables to key terminals (the feet of the terminal, as shown). Slide the Cable Tidy back into position until you hear it click into place.

2. Insert a paper roll & switch on

- Using your fingers, pinch the sides of the Paper Cover and pull up firmly.
If this is a new terminal, remove the roll from the holder and remove any outer packaging that may be present.
- Drop the paper roll into the holder with the paper feeding from underneath the roll.
- Pull a short length of the paper over the screen.
- Slide the Paper Cover over the paper until you hear it click.
- Pull and tear the paper cover the enclosed edge as shown.
- Plug the Power Supply into an electrical socket and switch on the supply.

After power is on, the terminal will show the clock and date on the main information screen.

NOTE: IPv6v6 display

If the power is on, the terminal will display a message indicating that IPv6v6 is enabled and will show the current time and date on the main information screen.

DO NOT disconnect the power supply from the terminal as this will cause the terminal to lose its configuration and will require a factory reset. If you are unsure, please contact your retailer or Spire support.

Updates

Once a month, your terminal will connect to Spire updates to download any new software and/or important changes*. This update will typically occur during the night. For this reason, Spire suggests you leave your terminal powered on at all times. In the event of it being switched off when the update is due to take place, your terminal will notify you to leave its power on for another update attempt the following night.

*The Next Operating System (NOS) update will be changed to a per merchant update window in the future and will be managed by the merchant's system. This change is not yet implemented.

Please turn over for continued... 111
