Amanda C. Seaman, 2016-12-31 Writing Pregnancy in Low Fertility Japan is a wide ranging account of how women writers have made sense and nonsense of pregnancy in postwar Japan While earlier authors such as Yosano Akiko had addressed the pain and emotional complexities of childbearing in their poetry and prose the topic quickly moved into the literary shadows when motherhood became enshrined as a duty to state and sovereign in the 1930s and 40s This reproductive imperative endured after World War II spurred by a need to create a new generation of citizens and consumers for a new peacetime nation It was only in the 1960s in the context of a flowering of feminist thought and activism that more critical and nuanced appraisals of pregnancy and motherhood began to appear In her fascinating study Amanda C Seaman analyzes the literary manifestations of this new critical approach in the process introducing readers to a body of work notable for the wide range of genres employed by its authors including horror and fantasy short stories novels memoir and manga the many political personal and social concerns informing it and the diverse creative approaches contained therein This pregnancy literature Seaman argues serves as an important yet rarely considered forum for exploring and debating not only the particular experiences of the pregnant mother to be but the broader concerns of Japanese women about their bodies their families their life choices and the meaning of motherhood for individuals and for Japanese society It will be of interest to scholars of modern Japanese literature and women s history as well as those concerned with gender studies feminism and popular culture in Japan and beyond
