seminar on Logic for System Engineering organized during the first week of March 1997 by S Jähnichen J Loeckx and M  
Wirsing During that seminar after Egon Börger's talk on How to Use Abstract State Machines in Software Engineering  
Wolfram Schulte at the time a research assistant at the University of Ulm Germany questioned whether ASMs provide  
anything special as a scientifically well founded and rigorous yet simple and industrially viable framework for high level  
design and analysis of complex systems and for natural refinements of models to executable code Wolfram Schulte argued  
referring to his work with K Achatz on A Formal Object Oriented Method Inspired by Fusion and Object Z 1 that with current  
techniques of functional programming and of axiomatic specification one can achieve the same result An intensive and long  
debate arose from this discussion At the end of the week it led Egon Börger to propose a collaboration on a real life  
specification project of Wolfram Schulte's choice as a comparative field test of purely functional declarative methods and of  
their enhancement within an integrated abstract state based operational ASM approach After some hesitation in May 1997

Wolfram Schulte accepted the offer and chose as the theme a high level specification of Java and of the Java Virtual Machine
