T-26 Light Tank Steven J. Zaloga, 2015-01-20 The T 26 was the first major Soviet armour program of the 1930s beginning as a license built version of the British Vickers 6 ton export tank Although the T 26 retained the basic Vickers hull and suspension the Red Army began to make extensive changes to the turret and armament starting with the addition of a 45mm tank gun in 1933 The T 26 was built in larger numbers than any other tank prior to World War II Indeed more T 26 tanks were manufactured than the combined tank production of Germany France Britain and the United States in 1931 40 This book surveys the development of the T 26 as well as its combat record in the Spanish Civil War the war in China the border wars with Poland and Finland in 1939 40 and the disastrous battles of 1941 during Operation Barbarossa *Soviet Tanks in Manchuria 1945* William E. Hiestand, 2023-03-16 A new illustrated study of the devastating but little known Soviet armored blitzkrieg against the Japanese in the last weeks of World War II and how it influenced Soviet tank doctrine as the Cold War dawned Although long overshadowed in the West by the dropping of the atomic bombs on Hiroshima and Nagasaki the USSR s lightning strike into Manchuria in August 1945 was one of the most successful and unique campaigns of the era Soviet forces led by over 5 500 tanks and self propelled guns attacked across huge distances and deserts marshes and mountains to smash Japan s million strong Kwantung Army in a matter of days Japanese forces were short of training and equipment but nevertheless fought fiercely inflicting 32 000 casualties on the Soviets Red Army operations were characterized by surprise speed and deep penetrations by tank heavy forces born of the brutal lessons they had learned during years fighting the Wehrmacht Lessons from the campaign directly shaped Soviet Cold War force structure and planning for mechanized operations against the West Illustrated with contemporary artwork and rare photos from one of the best collections of Soviet military photos in the West this fascinating book explains exactly how the last blitzkrieg of World War II was planned fought and won and how it influenced the Red Army s plans for tank warfare against NATO in Europe T-26 Light Tank Steven J. Zaloga, 2015-01-20 The T 26 was the first major Soviet armour program of the 1930s beginning as a license built version of the British Vickers 6 ton export tank Although the T 26 retained the basic Vickers hull and suspension the Red Army began to make extensive changes to the turret and armament starting with the addition of a 45mm tank gun in 1933 The T 26 was built in larger numbers than any other tank prior to World War II Indeed more T 26 tanks were manufactured than the combined tank production of Germany France Britain and the United States in 1931 40 This book surveys the development of the T 26 as well as its combat record in the Spanish Civil War the war in China the border wars with Poland and Finland in 1939 40 and the disastrous battles of 1941 during Operation Barbarossa **SOVIET ARMoured FORCE** , BT Fast Tank Steven J. Zaloga, 2016-08-25 When the Red Army needed to mechanize its cavalry branch in the 1930s the BT fast tank was its solution Based on the American Christie high speed tank the Red Army began a program to adapt the design to its own needs Early versions were mechanically unreliable and poorly armed but by the mid 1930s the BT 5 emerged armed with

an excellent dual purpose 45mm gun It saw its combat debut in the Spanish Civil War in 1937 and was later used in the border battles with the Japanese Kwangtung Army in the late 1930s The final production series the BT 7 was the most refined version of the family One of the most common types in Red Army service in the first years of the Second World War BT tanks saw extensive combat in Poland Finland and the opening phases of Operation Barbarossa in 1941 and latterly during the 1945 campaign against the Japanese in Manchuria this is the story of their design and development history

Katyusha Jamie Prenatt,2016-06-16 Although military rockets have been used since the Middle Ages it was not until the Soviet Union pioneered the concept of Multiple Rocket Launchers MRLs in the late 1930s that they emerged as a decisive weapon In the modern era these Soviet Russian Katyushas have served in combat in Afghanistan Chechnya and Georgia Developed to fill the operational need for massed artillery fire support the MRL possesses enormous destructive power and a devastating psychological impact This New Vanguard provides a survey of Soviet and Russian Federation MRLs from the beginning of their development in 1941 to the present It focuses on the history design and specifications of self propelled ground MRL systems but also covers towed static railway and naval mounts It highlights the many variants of the principal systems and include MRL unit tables of organization and equipment information on MRL munition types and coverage of dedicated MRL resupply vehicles *Faustian Bargain* Ian Ona Johnson,2021-05-28 Offers the full story of a fateful alliance between past and future mortal enemies long preceding the well known Ribbentrop Molotov Pact whose dimensions were kept secret from the outside world and yet which set the stage for World War Two and its outcome ARMA ACORAZADA SOVIÉTICA , *T-80 Standard Tank* Steven J. Zaloga,2011-10-20 The history of the little known yet controversial T 80 and its subsequent variants The Soviet T 80 Standard Tank was the last tank fielded before the Soviet collapse and the most controversial Despite having the most sophisticated fire controls and multi layer armor ever fielded on a Soviet tank its turbine power plant rather than a conventional diesel remained a source of considerable trouble throughout its career Steven J Zaloga charts the little known history of the T 80 covering the initial construction through the development to the subsequent variants the T 84 and Russia s enigmatic Black Eagle Tank Accompanying detailed cut away artwork illustrates the unusual design features that made the T 80 so controversial **Light Tanks** Mikhail Baryatinskiy,2006 It is one of the ironies of Soviet tank development that a country opposed to free enterprise and capitalism was largely reliant on influences from Britain and the USA for many of its early designs However unhindered by many of the tactical constraints that affected tank development in the West the Red Army was able to acquire and develop technology that was under rated in both Britain and the USA From Britain the famous manufacturer Vickers produced a Six Ton light tank effectively rejected by the War Office one example was acquired by the Russians and this formed the basis of the Russian T 26 of 1931 Further British designs also influenced the later light tanks equipment which was pivotal to the Red Army during its campaigns in Manchuria Finland and against the initial German assault in 1941 In the USA Walter Christie was also largely ignored as a designer but

as with Vickers his designs came to be highly important His influence was seen in the BT short for Bystrochodri or Fast Tank series of light medium tanks that was first introduced in 1932 The BT series saw service in Spain Manchuria Finland and in the defense of Russia itself in 1941 The critical aspect of the Christie design was that the vehicles were capable of operating both with nor without tracks in the latter case eight road wheels carried the weight of the vehicle with steering being achieved via a steering wheel acting in conjunction with the clutch brake system In the second of the new Soviet Tanks series Mikhail Baryatinsky provides the reader with a comprehensive account of the development and operational record of Soviet light tanks Utilizing photographs line drawings and speciallyprepared artworks he provides a detailed portrait of these highly successful tanks Aimed at the modeler military historian and war gamer the new Soviet Tanks series is designed to provide probably for the first time in the English language authoritative information on the classic Soviet tank designs of the 20th century The series will be required reading for all those interested in the development of armored warfare over the past 100 years

T-80 Standard Tank Steven J. Zaloga, 2011-10-20 The Soviet T 80 Standard Tank was the last tank fielded before the Soviet collapse and the most controversial Despite having the most sophisticated fire controls and multi layer armor ever fielded on a Soviet tank its turbine power plant rather than a conventional diesel remained a source of considerable trouble throughout its career Steven J Zaloga charts the little known history of the T 80 covering the initial construction through the development to the subsequent variants the T 84 and Russia s enigmatic Black Eagle Tank Accompanying detailed cut away artwork illustrates the unusual design features that made the T 80 so controversial
