Pressurized Irrigation Systems Nicola Lamaddalena,J. A. Sagardoy,Food and Agriculture Organization of the United
Nations,2000-01-01 With the strong competition that is arising for water resources the modernisation of irrigation systems is
becoming a critical issue One of the alternatives to modernisation is the use of pressurised systems to replace part of the
existing networks This publication analyses the performance of pressurised irrigation systems operating on demand and
provides revised criteria for the design of such irrigation networks For this purpose new approaches and a computer
program have been developed The program has been tested in several field situations in the Mediterranean Basin and has
demonstrated its usefulness not only by quickly identifying weak points in irrigation networks but also by identifying the
power requirements of pumping stations needed to satisfy varying demand situations *Cruising World* ,2001-01 **Mac**
