

UNIT 3: SUBTRACTION

LESSON 3.19

Balanced Equations: Addition and Subtraction

Solve to create balanced addition and subtraction equations within 20.

- ☐ Lesson 3.19 Teaching Slides
- ☐ Lesson 3.19 Copies
- ☐ Dry-Erase Pockets
- ☐ Dry-Erase Supplies
- ☐ Dice
- ☐ Balance Scale and Cubes (optional)

Think About It: Show students the Think About It slide. Give students plenty of silent thinking time for them to think of a number story that could be told about the picture shown. Students can make up any number story using the images on the slide. Allow students to share and have the class solve some of the number stories.

Review balancing equations in addition and also in subtraction. Use the teaching to slides to explain that today students will be balancing equations in the same way, but using both addition and subtraction. Give each student a Balanced Equations mat in a dry-erase pocket (or laminated) and a dry-erase marker. Work through the teaching slides together to find the total for the number sentence that is complete. Use that total to make the other side equal and fill in the missing number. The totals go beneath the number sentences on the balance scale.

Blizzard Rescue Race: Print the Blizzard Rescue Race gameboard in color or black/white for each set of partners. Students will choose a column and take turns rolling a die. They will use the number that they roll to fill a number sentence in their column to make balanced equations. They will color the box when they complete the number sentence. If they cannot use the number they roll, they lose a turn. The first player to fill up all of their boxes wins the rescue race!

Balancing Sled Dogs: Students will cut out the dog equations from the bottom of the page. Then, they will glue each dog next to the sled that makes balanced equations.

Students will demonstrate their understanding of balanced equations by solving for the missing part in each problem.

Attention: Use a balance scale with connecting cubes and give students two equations to solve. One with one equation having a missing part. Walk them through modeling one equation on one side of the balance scale and how to make the equations equal to balance the scale.

Extension: Refer to Lucky to Learn Math Grade 2, Unit 2 for extension activities involving subtraction.
