future educational success this document presents guidelines for what constitutes high quality programming across a broad spectrum of curriculum and practice for California preschools taking into account the state's move toward higher expectations for all students. The document is presented in three parts. Part 1 reviews the background and context of early childhood education with a particular focus on recent developments in the field in California. Part 2 consists of guidelines for all the major areas of a high quality preschool program with the themes of special needs, cultural diversity, parent and family involvement, assessment and professional development woven throughout the document. Part 3 presents a variety of resources for program implementation and improvement. Guidelines, examples and vignettes in the document offer directions on the best practices for school professionals drawing on research, the collective professional experience of an expert panel and on visits to the sites of exemplary programs throughout California and other states. Nine appendices include guideline summaries, a continuum of teaching behaviors and special needs legislation and services.

Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent. Consider the present: you have various forms of privatization, school choice, the No Child Left Behind act, home schooling, value added, accountability, alternative teacher preparation programs, on line instruction, etc. This range of activity is not exceptional. For instance, consider the past: progressive education, open education, the junior high school, the middle school, Life Adjustment education, career education, vocational education, the comprehensive high school, school to work, year round schooling, behavioral objectives, proficiency exams, high stakes testing, whole language, learning packages and self paced instruction, modular scheduling, site based management, all presented as the way to reform American schools at least in part. Then you have the reformers themselves such as John Dewey, George Counts, Herbert Kohl, John Holt, Charles Silberman, Admiral Hyman Rickover, James Bryant Conant, all the way back to Horace Mann himself. Dissenters and dissenting movements, while not as numerous and certainly not as

well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily
