draw diagrams in MS Paint and quote from fictional studies and journals Cover as authors write in the first person because their study is just a little too personal for them Recoil from the sheer mass of oversimplified methodology distilling someone's entire thesis into a paragraph of jokes crude enough to make it into a Mike Myers movie Over the last few years we have taken arguments that you would normally have after four Jack and cokes at game night and turned them into properly formatted research papers with a writing tone serious enough to confuse the uninitiated These papers are high effort jokes by researchers and scientists for researchers and scientists They cover a range of topics such as the consequences of releasing tourists back into Yellowstone National Park after COVID 19 how to play StarCraft competitively online on a quantum computer and most importantly how trees around the globe are becoming increasingly radicalized What you will learn How to draw a graph using MS Paint maybe Whether Sarah Palin is a figment of your imagination How one pirate cat brought about the extinction of the beloved dodo Why rabbits used to be jerks back in the day If you actually learn anything from these articles get your memory erased immediately Who this book is for This book is for researchers and those who love science mingled with humor It's for those who are a little too tired of the talking heads and futurists of the science world and would like something more entertaining in the form of absurd speculative studies by researchers as unbelievable as their work Anyone who has experienced academic writing or the tribulations of any research institution will enjoy the wide range of bizarre yet real world topics compiled in this book Even if you don't know much about the subject we usually have a background section
