These programs include both classroom courses and on the job training and take about 2-4 years to complete. Construction electricians read blueprints of circuit diagrams, install wiring and electrical controls in residential or commercial buildings and follow the state and local building regulations. They might also dictate and train workers who are learning the skills. It is a practical guide for ITI apprentices preparing for service interview or already employed. Electricians may be employed in the installation of new electrical components, machines and equipment or the maintenance and repair of existing electrical infrastructure.
