Principles and Practice of Highway Engineering Rattan Chand Sharma, S. K. Sharma, 1964 *Standard Specification Precast Concrete Box Culverts* Box Culvert Association, 1988 *Standard Precast Concrete Box Culverts* Box Culvert Association, 1987 **Safety in Petroleum Industries** Dhananjay Ghosh, 2021-04-26 *Safety in Petroleum Industries* covers pertinent safety aspects and precautions to be taken for design operation maintenance inspection and project constructions for petroleum industries with an emphasis on petroleum refineries Relevant practical knowledge and experience contributing to safe and sustained operation of the industry has been compiled with all necessary references Identified areas where theoretical inputs are required have also been incorporated Learning objectives for the petroleum industries have been identified and discussed in an organized manner based on author's more than thirty five years of experience in petroleum and chemical industries Aimed at practicing engineers in upstream and downstream petroleum industries this book Covers safety tips for operation of petroleum industries Documents design codes tools and practices including safe operating practices of different equipment and safety procedures in a single source Includes detailed safety procedures like HAZOP Safety Audit management safety review and process safety management Contains dedicated chapters on Fire Fighting and Industrial Hygiene and Ergonomics Discusses first hand experienced examples and burning issues in the petroleum industry **Standard Specification** , 1991 *Standard Precast Concrete Box Culverts* , 1995 **Design Automation for Box Culverts Using Web Based Application** Manmeetsingh Sethi, 2015 One of the fast and economical ways of putting tunnels or stream crossings under roadways is to use box culverts Box culverts are structurally rigid easy to construct and easy to add length when needed Because of their simple geometric configuration precast concrete box culverts with various dimensions are commonly used in the U S In some cases non standard box culverts are also used for which the design document has to be produced per project design specification The design process of box culverts is relatively easy and repetitive because of their typical geometric configuration In practice engineers are following exactly the same process with different dimensions and loading conditions to design box culverts Microsoft Excel spreadsheet is therefore often used to speed up this repetitive calculation process In India many designers use STAAD Pro for the structural analysis of box culverts and bring the results of this analysis to a Microsoft Excel spreadsheet to carry out the remaining calculations However all these cases are dealt separately and a significant amount of time is used to come up with the final design In addition it has been challenging to keep all engineering calculations and drawings of a specific box culvert for its lifecycle One of the solutions that one can come up with for this challenge is to automate the entire design process in one package and keep all design documents in one location This study presents the Web based application we developed to 1 automate the box culvert design process and 2 keep all design documents in one location This Web based application is developed based on Indian Standard codes IS and Indian road congress codes IRC using ASP net This study presents how this application was developed

how it is working and how it improved the design process of box culverts in our tests This study shows that results obtained from this application are very close to the traditional design process and can be successfully used for designing of box culverts in India Also the study concludes that there is a significant amount of time saving in the design process when this application is used instead of traditional design process The electronic version of this dissertation is accessible from <http://hdl.handle.net/1969/1/155015>
