universal translator: A computer program available in the Voyager main computer. This program can analyze almost any alien language form and translate it into English and vice versa. The universal translator does not work with all language forms, and it has been known to be somewhat unreliable in cases where there has been insufficient time for the computer to analyze the alien language form.

Warp factor: The unit used to measure the speed of faster-than-light travel. Warp factor one is the speed of light. Normal cruising speed for Voyager is Warp 6. Maximum sustainable speed is Warp 9.2. No ship can achieve a speed of Warp 10, the theoretical maximum. Even at the incredible speeds afforded by warp drive, Federation space is still some 75 years away for Voyager. Returning home by normal warp travel is not an option.

warp drive: The main propulsion system of Voyager and most starships. This system enables our ship to travel faster than light, necessary because of the incredibly vast distances between stars. The Voyager warp drive is powered by a matter/antimatter reactor, controlled by dilithium crystals.

Lively, 2020-03-19 In 1995 Star Trek Voyager brought a new dynamic to Star Trek s familiar starship oriented show Lost 70 000 light years in

space Voyager and its crew faced an uncertain and changeable future echoing anxieties felt in the United States at the time. These fifteen essays explore the context, characters and themes of Star Trek Voyager as they relate to the culture and zeitgeist of the 1990s. Essays on gender show how the series both challenges and reinforces typical SF stereotypes through the characters of Captain Janeway, Kes and Seven of Nine, while essays on identity examine the show's intersections with disability studies, race and multiracial identities, family dynamics and emerging AI and humanity. Using the epic journey of Homer's Odyssey as a starting point for the series and ending with an examination of the impacts of inception at the birth of the internet age, this book shows the many ways in which Voyager negotiated different perspectives for what the future of the galaxy and the USA could be.

Treconomics Manu Saadia, 2016-05-31 Manu Saadia has managed to show us one more reason, perhaps the most compelling one of all, why we all need the world of Star Trek to one day become the world we live in. Chris Black, Writer and Co-Executive Producer, Star Trek Enterprise. What would the world look like if everybody had everything they wanted or needed? **Treconomics**, the premier book in financial journalist Felix Salmon's imprint PiperText, approaches scarcity economics by coming at it backwards through thinking about a universe where scarcity does not exist. Delving deep into the details and intricacies of 24th century society, **Treconomics** explores post-scarcity and whether we as humans are equipped for it. What are the prospects of automation and artificial intelligence? Is there really no money in Star Trek? Is **Treconomics** at all possible?

Star Trek Duncan Barrett, Michèle Barrett, 2016-08-05 In a world shrunk by modern transport and communication, Star Trek has maintained the values of western maritime exploration through the discovery of strange new worlds in space. Throughout its fifty-year history, the starry sea has provided a familiar backdrop to an ongoing interrogation of what it means to be human. This book charts the developing Star Trek story from the 1960s through to the present day. Although the core values and progressive politics of the series' earliest episodes have remained at the heart of Star Trek throughout half a century, in other ways the story it tells has shifted with the times.
