XXIV Olympiad Ellen Galford, 2015-11-18 XXIV Olympiad the twenty second volume in The Olympic Century series tells the story of the 1988 Summer Olympics of Seoul Korea The second Olympics held in Asia would be the last for perennial sporting powerhouses the Soviet Union and East Germany which ceased to exist before the next Olympiad The book gives a detailed account of the most infamous episode from Seoul which saw Canadian sprinter Ben Johnson achieve a dramatic win in the men's 100 metres only to have his gold medal stripped away for failing a post race drug test The book also profiles heroes of Seoul like Christa Luding Rothenburger of East Germany who became the only athlete to ever win gold in both Winter speed skating in Calgary and Summer cycling Games in the same year and swimmer Anthony Nesty who won Suriname's only Olympic medal and became the first male black swimmer to win individual gold The second part of the book focuses on the 1992 Winter Olympics of Albertville France Albertville was the last Winter Games to be held in the same year as the Summer Games and mogul skiing short track speed skating and women's biathlon made their Olympic debuts The book profiles stars of

Albertville like 16 year old Finnish ski jumper Toni Nieminen who became the youngest ever male gold medalist at the Winter Games and Annelise Coberger of New Zealand who won silver in the women s slalom to become the first Winter Olympic medalist from the southern hemisphere Juan Antonio Samaranch former President of the International Olympic Committee called The Olympic Century e The most comprehensive history of the Olympic games ever publishede The Evolution of Endothermy - From Patterns to Mechanisms Elias T. Polymeropoulos, Rebecca Oelkrug, Martin Jastroch, 2018-09-14 Metabolic rate is a key ecophysiological factor determining fitness distribution survival and reproductive strategies of organisms The ability to endogenously produce heat and elevate body temperature beyond ambient has far reaching ecological implications The diversity of thermogenic mechanisms and strategies employed throughout the animal kingdom is truly phenomenal and one of the greatest biological mysteries Interestingly even heat producing plants have been characterised Over the last several decades the oversimplified distinction between warm and cold blooded animals has well and truly been put to rest and the terms endo and ectotherm have been established Birds and mammals are regarded as endotherms capable of maintaining high body temperatures within highly precise boundaries On contrary in ectothermic organisms ambient temperature governs body temperature and metabolism encompassing the majority of present day species However it has recently become very clear that this distinction is still not accurate enough to describe the vastness of heat generating mechanisms within endo but also ectotherms Indeed a plethora of ectothermic animals display endogenous as well as behavioural means of temperature control and mechanisms for heat generation There is large diversity in regards to thermoregulatory ability and strategy within endotherms as well with some groups being classified by separate categories such as basoendotherms and mesotherms Considerable interest and efforts has been put into the quest to understand the underlying physiological mechanisms leading and facilitating high metabolic rates and body temperatures of endotherms These mechanisms are far from being exhaustively studied and the evolutionary trajectory leading to high metabolic rates and stable body temperatures is equally vividly debated This discussion includes an array of questions and theories surrounding the presence of endothermy in extinct dinosaurs In addition a lively debate surrounds the evolutionary drivers promoting the establishment of endothermy with clear support of direct or indirect selective benefits Within this Research Topic we plan to compile the latest ideas knowledge and experimental work to elucidate the patterns of the evolution of endothermy and its transition distinction from ectothermy The focus is on key physiological mechanisms supporting this transition and contributing to the maintenance of high metabolic rates and body temperature in endotherms as well as mechanisms for local heterothermy and heat dissipation in ectotherms These mechanisms and conclusions may be derived from different levels of organisation such as population taxon species as well as tissue cellular or molecular levels It may also encompass novel experimental or theoretical models testing evolutionary theories of endothermy A comparative approach is encouraged but not fundamental **IX Olympiad** George Russell, 2015-11-18 The IX Olympiad the ninth volume in The

Olympic Century series begins by exploring the Summer Games of Amsterdam 1928 the first to feature the Olympic flame as well as the first to include track and field and gymnastics competitions for women Well established as the world s greatest festival of sport the Olympic Games rose to new heights in Amsterdam The book tells the story of Olympic heroes like Paavo Nurmi the legendary Finnish distance runner who claimed one more gold medal in 1928 to take his personal total to nine from three Olympics and the Canadian sprinter Percy Williams who claimed the title of world s fastest man with golds in both the 100 and 200 metres Amsterdam also saw the triumph of triple jumper Mikio Oda of Japan who became the first gold medalist from Asia and American double gold swimmer Johnny Weismuller who would go on to star in Hollywood as Tarzan the Ape Man Following the Amsterdam Games the focus turns to Lake Placid N Y and the Winter Games of 1932 The book tells the story of athletes like American speed skater Irving Jaffee who lunged for gold in a thrilling photo finish in the 10 000 metres Sonja Henie of Sweden who would claim her second of three consecutive figure skating titles and American Eddie Eagan who would add a team gold in four man bobsleigh to his gold in boxing won in the Antwerp Olympics 12 years earlier Juan Antonio Samaranch former President of the International Olympic Committee called The Olympic Century e The most comprehensive history of the Olympic games ever publishede

The Man Who Broke Capitalism

David Gelles,2022-05-31 New York Times Bestseller New York Times reporter and Corner Office columnist David Gelles reveals legendary GE CEO Jack Welch to be the root of all that s wrong with capitalism today and offers advice on how we might right those wrongs In 1981 Jack Welch took over General Electric and quickly rose to fame as the first celebrity CEO He golfed with presidents mingled with movie stars and was idolized for growing GE into the most valuable company in the world But Welch s achievements didn t stem from some greater intelligence or business prowess Rather they were the result of a sustained effort to push GE s stock price ever

higher often at the expense of workers consumers and innovation In this captivating revelatory book David Gelles argues that Welch single handedly ushered in a new cutthroat era of American capitalism that continues to this day Gelles chronicles Welch s campaign to vaporize hundreds of thousands of jobs in a bid to boost profits eviscerating the country s manufacturing base and destabilizing the middle class Welch s obsession with downsizing he eliminated 10% of employees every year fundamentally altered GE and inspired generations of imitators who have employed his strategies at other companies around the globe In his day Welch was corporate America s leading proponent of mergers and acquisitions using deals to gobble up competitors and giving rise to an economy that is more concentrated and less dynamic And Welch pioneered the dark arts of financialization transforming GE from an admired industrial manufacturer into what was effectively an unregulated bank The finance business was hugely profitable in the short term and helped Welch keep GE s stock price ticking up But ultimately financialization undermined GE and dozens of other Fortune 500 companies Gelles shows how Welch s celebrated emphasis on increasing shareholder value by any means necessary layoffs outsourcing offshoring acquisitions and buybacks to name but a few tactics became the norm in American business generally He demonstrates how that approach has led to the greatest socioeconomic inequality since the Great Depression and harmed many of the very companies that have embraced it And he shows how a generation of Welch acolytes radically transformed companies like Boeing Home Depot Kraft Heinz and more Finally Gelles chronicles the change that is now afoot in corporate America highlighting companies and leaders who have abandoned Welchism and are proving that it is still possible to excel in the business world without destroying livelihoods gutting communities and spurning regulation

Out of the Running
Shauna Shames, 2017-01-31 An inside look into why Millennials are rejecting careers in politics and what this means for the future of America s political system Millennials are often publically criticized for being apathetic about the American political process and their lack of interest in political careers But what do millennials themselves have to say about the prospect of holding political office Are they as uninterested in political issues and the future of the American political system as the media suggests *Out of the Running* goes directly to the source and draws from extensive research including over 50 interviews with graduate students in elite institutions that have historically been a direct link for their graduates into state or federal elected office Harvard Law Harvard s Kennedy School of Government and Boston s Suffolk University Law School Shauna Shames herself a young graduate of Harvard University suggests that millennials are not uninterested rather they don t believe that a career in politics is the best way to create change Millennials view the system as corrupt or inefficient and are particularly skeptical about the fundraising frenzied media attention and loss of privacy that have become staples of the American electoral process They are clear about their desire to make a difference in the world but feel that the broken political system is not the best way to do so a belief held particularly by millennial women and women of color The implications of Shames argument are crucial for the future of the American political system how can a system adapt and

grow if qualified intelligent leaders are not involved An engaging and accessible resource for anyone who follows American politics Out of the Running highlights the urgent need to fix the American political system as an absence of diverse millennial candidates leaves its future in a truly precarious position *The A-Z of Pointless* Alexander Armstrong,Richard Osman,2015-10-08 Journey from A Z playing 26 rounds of Pointless with family and friends and enjoy facts banter and musings from Alexander Armstrong and Richard Osman Inside you ll find hundreds of questions for all the family from TV s most popular quiz show Pointless You will also find thousands of answers which is very handy Taking you on a journey from A to Z you will learn amazing facts from Agincourt and Andy Warhol to Zinedine Zidane and Zimbabwe and everything in between As an added bonus Alexander Armstrong and Richard Osman also reveal their exclusive A to Z of behind the scenes gossip and Pointless secrets all written with their trademark wit alongside exclusive drawings by Moose Allain Everyone you know will love this book Except maybe for that couple you met on holiday and be honest you didn t really like them anyway I mean she was alright but what was up with him Rivers of Iron David M.
