Shifting to Online Learning Through Faculty Collaborative Support Crawford, Caroline M., 2021-06-18 As a result of the COVID-19 pandemic, most schools had to suddenly shift from traditional face-to-face courses to blended, synchronous, and asynchronous instructional environments. The impact upon the immediacy of remote learning was overwhelming to many faculty, instructional facilitators, teachers, and trainers. Many faculty and trainers have experience with the analysis, design, development, implementation, and evaluation of online and blended learning environments, while many faculty and trainers also do not have this knowledge nor experience. As such, the collegial workspace has developed into a collaborative work environment wherein the faculty are helping faculty, partially because the instructional designer staff and learning advisors are overwhelmed with the number of course projects that must be moved from traditional face-to-face course environments into an online environment within a short period of time. The faculty are helping each other make this move, offering course design and development support and also instructional tips and tricks that will support successful blended and online experiences that enhance learning outcomes. *Shifting to Online Learning Through Faculty Collaborative Support* focuses on supporting and enhancing blended and distance learning, course design, and development, successful tips for course design and teaching techniques for online learning, and embracing collegial mentorship and facilitative support for course and faculty success. This book highlights the strength of collegial bonds while discussing tools, methods, procedural efforts, styles of engagement, learning theories, assessment efforts, and even social learning engagement implementations in online learning. It provides information and lessons and embraces a long-term approach towards understanding institutional impact and collegial support. This book is valuable for school administrators, teachers, course designers, instructional designers, school faculty, business and administrative leadership practitioners, stakeholders, researchers, academicians, and students interested in how faculty collaborative support is playing a critical role in improving and developing successful online learning.

Observational Research in U.S. Classrooms

Hersholt C. Waxman, Roland G. Tharp, R. Soleste Hilberg, 2004-01-26 The present national reform agendas stress that rigorous content and high expectations be accessible to all students including students from groups whose achievement has traditionally lagged behind that of the majority culture students. Improving the achievement in US schools important for both social and economic stability will require that instruction be responsive to our nation's increasingly diverse student population. This book includes theoretical frameworks as well as substantive research findings and provides examples of recently developed classroom observation instruments based on research of effective teaching practices for culturally and linguistically diverse students. Each chapter represents a new aspect of classroom observation research that will assist educators in their endeavors to improve US schools.

Higher grounds Patience Adjekai Sowa, PhD, Rachel Jordan, Wendi Ralaingita, Benjamin Piper, 2021-05-23 To address chronically low primary school completion rates and the disconnect between learners' skills at the end of primary school and the skills learners need to thrive in secondary school identified in many low and middle income countries more investment is needed to improve the quality of teaching and learning in upper primary grades. Accordingly we provide guidelines for improving five components of upper primary education: 1. In service teacher professional development and pre service preparation to improve and enhance teacher quality; 2. a focus on mathematics literacy and core content area subjects; 3. assessment for learning; 4. high quality teaching and learning materials; and 5. positive school climates. We provide foundational guiding principles and recommendations for intervention design and implementation for each component. Additionally we discuss and propose how to structure and design pre service teacher preparation and in service teacher training and ongoing support fortified by materials design and assessment to help teachers determine where learners are in developmental progressions, move learners towards mastery and differentiate and support learners who have fallen behind. We provide additional suggestions for integrating a whole school climate, curriculum, social emotional learning and school related gender based violence prevention strategies to address the internal and societal changes learners often face as they enter upper primary.

Affordances and Constraints of Mobile Phone Use in English Language Arts Classrooms

Moran, Clarice M., 2020-12-25 The use of phones in the classroom is a controversial topic that receives a variety of reactions and can have political ramifications. In various school districts across different states as well as in some countries, cell phone usage has been banned in the classroom to combat what administrators say is a distracted student population. However, research demonstrates that cell phones can have a positive effect on learning and engagement. Instead of banning cell phones, some teachers have found ways to incorporate educational apps, gaming apps, and social media into course materials. Although

much research has emerged involving the integration of technology and digital literacies in English language arts ELA classrooms mobile phone use as a discrete construct has not been explored widely Affordances and Constraints of Mobile Phone Use in English Language Arts Classrooms aims to shine a light on the controversial topic of mobile phones in the English language arts classroom focusing on comparing the opportunities that they afford students as well as the negative effects they can have on learning The chapters within this book examine learning outcomes best practices and practical applications for using mobile phones in ELA and adds to the body of literature on mobile phone use in secondary classrooms in general standing as a unique resource on mobile phones in the language arts curriculum While highlighting topics that include gaming applications online learning student engagement and classroom management this book is ideally designed for inservice and preservice teachers administrators teacher educators practitioners stakeholders researchers academicians and students who are interested in learning more about the pluses and minuses of mobile phone use in ELA **American**
