**Grade Level(s):** 4

**Subject(s):**

- Science/Physics

**Duration:** 30 minutes

**Description:** A learning cycle format for inquiry teaching. Journal about what students think causes a lightbulb to light up when rubbed with a plastic bag. Then several activities for students to explore how static electricity works. An opportunity to use knowledge learned and get an accurate assessment of students' understanding of static.

**Goals:** To teach through inquiry method about static electricity. For students to learn these main points about static electricity:

- \* Positive and negative charges attract each other.
- \* Charges can jump from one object to another when there is a build-up of electrons.
- \* This build-up is called static electricity.

**Objectives:**

Students will be able to explain how static electricity works in journal entry. They will also show how objects can become negatively charged and attract other objects, causing static electricity.

**Materials:**

balloons, salt, pepper, plastic rulers, cloth or wool, torn up pieces of paper, paper plates, questions for each activity
