So werden in 260 Kurzbiografien die subjektive Dimension der Baustatik und der Strukturmechanik von der frühen Neuzeit bis heute entfaltet. Dabei werden die wesentlichen Beiträge der Protagonisten der Baustatik besprochen und in die nachfolgende Bibliografie integriert. Berücksichtigt wurden nicht nur Bauingenieure und Architekten sondern auch Mathematiker, Physiker, Maschinenbauer sowie Flugzeug- und Schiffbauer. Neben den bekannten Persönlichkeiten der Baustatik wie Coulomb, Culmann, Maxwell, Mohr, Müller-Breslau, Navier, Rankine, Saint-Venant, Timoshenko und Westergaard wurden u.a. auch G. Green, A.N. Mit erstaunlicher Dynamik hat sich die Bautechnikgeschichte in den vergangenen Jahrzehnten zu einer höchst lebendigen, international vernetzten und viel beachteten eigenständigen Disziplin entwickelt. Auch wenn die nationalen Forschungszugänge unterschiedliche Akzente setzen, eint sie doch das Bewusstsein, dass gerade die inhaltliche und methodische Vielfalt und das damit verbundene synthetische Potenzial die Stärke des neuen Forschungsfeldes ausmachen. Bautechnikgeschichte erschließt neue Formen des Verstehens von Bauen zwischen Ingenieurwesen und Architektur, zwischen Bau und Kunst, Technik und Wissenschaftsgeschichte. The New Global Rulers Tim Büthe, Walter Mattli, 2011-02-28. Global private regulations: who wins, who loses and why

Over the past two decades governments have delegated extensive regulatory authority to international private sector organizations. This internationalization and privatization of rule making has been motivated not only by the economic benefits of common rules for global markets but also by the realization that government regulators often lack the expertise and resources to deal with increasingly complex and urgent regulatory tasks. The New Global Rulers examines who writes the rules in international private organizations as well as who wins who loses and why. Tim B. the and Walter Mattli examine three powerful global private regulators: the International Accounting Standards Board which develops financial reporting rules used by corporations in more than a hundred countries and the International Organization for Standardization and the International Electrotechnical Commission which account for 85 percent of all international product standards. B. the and Mattli offer both a new framework for understanding global private regulation and detailed empirical analyses of such regulation based on multi country multi industry business surveys. They find that global rule making by technical experts is highly political and that even though rule making has shifted to the international level domestic institutions remain crucial. Influence in this form of global private governance is not a function of the economic power of states but of the ability of domestic standard setters to provide timely information and speak with a single voice. B. the and Mattli show how domestic institutions abilities differ particularly between the two main standardization players: the United States and Europe.
