Mixtures are not compounds.	When is something a mixture, and when is it a compound?	LO1 Distinguish between the different types of mixtures LO2 To separate a mixture LO3 To determine the molarity of a solution LO4 To determine the mass of a solute in a solution	Explain the differences between the two main types of a mixture describe the process and use of filtration, distillation, and chromatography in the separation of a mixture To use given formulas for concentration and solve for missing variables To determine the preparation of a solution	Given a particular mixture, students are required to write a C&E explaining the type of mixture with proper evidence to support argument Lab1: Given a mixture, students will explore the three basic ways of separating a mixture through hands on experiments To answer specific requests/questions Planure mass Task: To describe the preparation of a solution given the desired molarity and volume of the solution
Solubility depends on three factors: temperature, pressure, and the chemical nature of the solute and solvent.	What does the old adage "like dissolves like" mean? If CO_2 is more soluble in water than Ar , is it possible to have carbonated glass?	LO1 Determine the polarity of a molecule LO2 Using Table F LO3 Interpret and construct solubility curves (J-days) LO4 To describe the solubility of gases	Draw Lewis dot structures and determine polarity based on geometry of a molecule Using Reference Table F Using Reference Table G Using solubility curves to distinguish among degrees of saturation Use of Table G	C&E are to whether a particular substance will dissolve in water or not Using Table F and G to answer specific questions Lab1: Students will construct a solubility curve for KNO_3 C&E explanation
The boiling and freezing point of a solution is different than that of the pure solvent.	Why does salt cause the snow to melt in the winter?	LO1 explain freezing point depression and boiling point elevation of a solution	compare boiling and freezing points of solutions vs. pure solvents	C&E to rank the salts with the greater effect on boiling point and freezing point
