Ucu Admission January Intake 2016:

Identities and Education Stephen Carney, Eleftherios Klerides, 2021-01-28 Education is central to the project of individual and collective identity formation national development and international relations and is crucial in moments of crisis What should be the agenda of study and action for education in such times Identities and Education engages with this crucial question seeking to examine and problematise our contemporary moment Through the heuristic of the concept of identity it specifically aims at creating a space for understanding our current challenges and considering the potential of education to address them Contributors in this volume explore identity crisis and education not only in interdisciplinary intersectional relational and eclectic ways but also through comparative lens The book includes contributions from leading scholars from Austria Cyprus Germany Greece Portugal the UK and the USA and covers issues and themes including fear hope refugee education and global citizenship education

Soft Systems Methodology in Education Jenny Gilbert, Simon Pratt-Adams, 2022-05-06 This book explores the application of Soft Systems Methodology in educational research as a qualitative research tool to generate theory and identifies the mechanisms that engender the behaviours and discourse of social groups Grounded within the literature from philosophy and science the approach is predicated on the ontology and epistemology of critical realism The authors consider the tenets of systems thinking recognizing that emergent features appear at higher levels of complexity within a hierarchy and that unintended consequences can occur when making decisions in complex situations with interacting components The central element of the book is the formulation of a research strategy entitled Worldview Metaphor and Power of Social Objects Womposo and its application to a research study of the practicum experience of teachers in training Integral to the methodology is the creation of rich pictures and diagrams Additionally images representing different stakeholders views of the whole system are presented in revealing illustrations allowing the reader to grasp each holistic metaphor It is suitable for postgraduate students and researchers in education and other social science programmes

The Long Walk to Equality Avis Whyte, Patricia Tuitt, Judith Bourne, 2024-02-20 In 1965 the UK enacted the Race Relations Act while the International Convention on the Elimination of all Forms of Racial Discrimination ICERD opened for signature and ratification In the US the changes that brought down the walls of segregation conveying some equality to black people essentially began with the Civil Rights Act of 1964 These ground breaking instruments marked a commitment domestically and internationally by the state parties to the ICERD to address racial injustice and inequality through legal means Yet the intervening years reveal the challenges of pursuing racial justice and equality through the medium of law In recent years allegations of institutional racism have been levelled against numerous public institutions in the UK while the rise of populism globally has challenged the ability of law to effect change This edited collection draws attention to the need to reflect on the persistence of racial inequalities and injustices despite law s intervention and arguably because of its unconscious role in their promotion It does so from a multiplicity of perspectives ranging from the doctrinal

socio legal critical and theoretical thereby generating different kinds of knowledge about race and law By exploring contemporary issues in racial justice and equality contributors examine the role of law whether domestic or international hard or soft in advancing racial equality and justice and consider whether it can effect substantive change **Higher Education Institutions in the EU: Between Competition and Public Service** Andrea Gideon, 2017-02-05 This book investigates the impact of EU law and policy on the Member States higher education institution HEI sectors with a particular emphasis on the exposure of research in universities to EU competition law It illustrates how the gradual application of EU economic law to HEIs which were predominantly identified as being within the public sector creates tensions between the economic and the social spheres in the EU Given the reluctance of the Member States to openly develop an EU level HEI policy these tensions appear as unintended consequences of the traditional application of the EU Treaty provisions in areas such as Union Citizenship the free movement provisions and competition policy to the HEI sector These developments may endanger the traditional non economic mission of European HEIs In this respect the effects of Union Citizenship and free movement law on HEIs have received some attention but the impact of EU competition law constitutes a largely unexplored area of research and this book redresses that imbalance The aim of the research is to show that intended and unintended consequences of the EU economic constitution s are enhanced by a parallel tendency of Member States to commercialise formerly public sectors such as the HEI sector The book investigates the potential tensions through doctrinal analysis and a qualitative study focussing on the exposure of HEI research to EU competition law as an under researched example of exposure to economic constraints It concludes that such exposure may compromise the wider aims that research intensive universities pursue in the public interest Andrea Gideon is a Postdoctoral Research Fellow at the Centre for Law Business National University of Singapore for which she has suspended her position as Lecturer in Law at the University of Liverpool In her current project she is investigating the application of competition law to public services in ASEAN Her previous research concerned tensions between the economic and the social in the EU with a focus on EU competition law in which research area she earned her PhD at the University of Leeds in 2014 *Assessing and Enhancing Student Experience in Higher Education* Mahsood Shah, John T. E. Richardson, Anja Pabel, Beverley Oliver, 2021-11-09 The book makes an important contribution to the discourse on student experience in higher education The book includes chapters that cover important aspects of the 21st century student experience Chapters cover issues such as new trends and insights on the student experience the changing profile of students in higher education and performance measures used to assess the quality of student experience institutional approaches in engaging students using student voice to improve the quality of teaching COVID 19 and its impact on international students innovative partnerships between students and academic staff student feedback and raising academic standards the increased use of qualitative data in gaining insights into student experience the use of innovative learning spaces and technology to enhance the learning experience and the potentially disrupting nature of

student feedback and its impact on the health and wellbeing of academic staff and the increased use of social media reviews by students

The Palgrave Handbook of Imposter Syndrome in Higher Education Michelle Addison, Maddie Breeze, Yvette Taylor, 2022-04-11 This handbook explores feeling like an imposter in higher education and what this can tell us about contemporary educational inequalities Asking why imposter syndrome matters now we investigate experiences of imposter syndrome across social locations institutional positions and intersecting inequalities Our collection queries advice to fit in with the university and authors reflect on not belonging in with and against educational institutions The collection advances understandings of imposter syndrome as socially situated in relation to entrenched inequalities and their recirculation in higher education

Chapters combine creative methods and linger on the figure of the imposter wary of both individualising and celebrating imposters as lucky misfits fraudsters or failures and critically interrogating the supposed universality of imposter syndrome

Higher Education and Working-Class Academics Teresa Crew, 2020-12-09 This book examines how a working class habitus interacts with the elite culture of academia in higher education Drawing on extensive qualitative data and informed by the work of Pierre Bourdieu the author presents new ways of examining impostor syndrome alienation and microaggressions all common to the working class experience of academia The book demonstrates that the term working class academic is not homogenous and instead illuminates the entanglements of class and academia Through an examination of such intersections as ethnicity gender dis ability and place the author demonstrates the complexity of class and academia in the UK and asks how we can move forward so working class academics can support both each other and students from all backgrounds
