Uk Wwf Report Rainforest For Biofuel:

Rethinking the Environmental Impacts of Renewable Energy Alexander Clarke, 2016-08-25 Renewable energy is important as a substitute for finite fossil fuels and inflexible nuclear power and could conceivably power the world. However, this is challenging as the world is currently 80% dependent on fossil fuels and renewable sources produce only about 15% of total energy. Conversion technologies for use with many of the eight different primary sources of renewable energy are only just emerging as viable technologies. While renewable energy sources will not run out and their use involves little or no release of carbon dioxide or ionising wastes, they do have local environmental impacts of their own. This book analyses the nature of environmental impacts from renewable sources. A novel method of assessing impacts is explored based on a set of parameters centred on how diffuse or concentrated the energy flow is. The approach that is developed will inform engineers, designers, policy makers and planners as well as researchers in the area. Handbook of the International Political Economy of Governance Anthony Payne, Nicola Phillips, 2014-04-25 Since the 1990s many of the assumptions that anchored the study of governance in international political economy (IPE) have been shaken loose. Reflecting on the intriguing and important processes of change that have occurred and are occurring. **Are biofuels sustainable?** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2008-01-21 Are biofuels Sustainable? First report of session 2007-08 Vol 2 Oral and written Evidence *Challenges and Opportunities for the World's Forests in the 21st Century* Trevor Fenning, 2013-12-03 This book addresses the challenges and opportunities faced by the world's forests posed by climate change, conservation objectives and sustainable development needs, including bioenergy, outlining the research and other efforts that are needed to understand these issues along with the options and difficulties for dealing with them. It contains sections on sustainable forestry, forest resources worldwide, forests, forestry and climate change, the economics of forestry, tree breeding, biotechnological approaches, genomic studies with forest trees, bioenergy, lignin and forest science, including ecological studies. The chapters are contributed by prominent organisations or individuals with an established record of achievement in these areas and present their ideas on these topics with the aim of providing a ready source of information and guidance on these topics for politicians, policy makers and scientists for many years to come. *Balderdash* Antti P. Balk, 2012 Discussing everything from God to Santa Claus, Prozac to the Taliban and beyond, the author asserts that ethics is balderdash. **Biofuels and the Sustainability Challenge** Aziz Elbehri, Anna Segerstedt, Pascal Liu, 2013 Biofuels' global emergence in the last two decades is met with increased concerns over climate change and sustainable development. This report addresses the core issue of biofuel sustainability of biofuels and related feedstocks, drawing from a wide range of sustainability-related studies, reports, policy initiatives. The report critically examines the economic, environmental and social sustainability dimensions of biofuels and reviews the major certification initiatives, schemes and regulations. In doing so, the report relies on extensive review of a number of country case studies covering a broad range of current biofuel feedstocks.

systems The report analysis clearly distinguish feedstock efficiency in terms of biofuel yields per unit of land from sustainability especially under limiting resource irrigated water or sensitive areas carbon stocks Also long run economic viability depend on the future policy support technical innovations in biofuel systems economics of biofuel supply and demand and trade offs between food and energy uses as well as feedstock productivity gains Biofuels can present both advantages and risks for environmental sustainability the latter being often difficult to measure or monitor and may conflict with economic sustainability unless great strides in productivity gains are achieved Social sustainability is the weakest link in current biofuel certification schemes owing to intrinsic local factors and as efforts target more few negative social impacts much less focus is placed on inclusive processes that strengthen marginal stockholders participation and benefits Biofuel certification schemes need to be more smallholder inclusive perhaps through policy initiatives Finally poor developing countries especially with abundant land and biomass production potential need to prioritise food security and poverty reduction In many cases biofuel models that encourage small scale integrated bioenergy systems may offer higher rural development impacts FDI induced larger scale biofuel projects on the other hand may be suitable in those situations where countries have sufficient industrial capacity besides land and biomass potential and when these biofuel projects can be fully integrated into domestic energy strategies that do not conflict with food production potential and food security

Soil Not Oil Vandana Shiva,2015-10-06 This modern day Silent Spring addresses climate change head on arguing that the solution to this global crisis lies in sustainable biologically diverse farms In *Soil Not Oil* Vandana Shiva explains that a world beyond dependence on fossil fuels and globalization is both possible and necessary Condemning industrial agriculture as a recipe for ecological and economic disaster Shiva champions the small independent farm their greater productivity their greater potential for social justice as they put more resources into the hands of the poor and the biodiversity that is inherent to the traditional farming practiced in small scale agriculture What we need most in a time of changing climates and millions who are hungry she argues is sustainable biologically diverse farms that are more resistant to disease drought and flood The solution to climate change she observes and the solution to poverty are the same *Soil Not Oil* proposes a solution based on self organization sustainability and community rather than corporate power and profits

Managing Forest Resources in a Decentralized Environment Petrus Gunarso,2007-01-01

Natural Capital Dieter Helm,2015-05-12 Natural capital is what nature provides to us for free Renewables like species keep on coming provided we do not drive them towards extinction Non renewables like oil and gas can only be used once Together they are the foundation that ensures our survival and well being and the basis of all economic activity In the face of the global local and national destruction of biodiversity and ecosystems economist Dieter Helm here offers a crucial set of strategies for establishing natural capital policy that is balanced economically sustainable and politically viable Helm shows why the commonly held view that environmental protection poses obstacles to economic progress is false and he explains why the environment must be at the very core of economic planning

He presents the first real attempt to calibrate measure and value natural capital from an economic perspective and goes on to outline a stable new framework for sustainable growth Bristling with ideas of immediate global relevance Helm's book shifts the parameters of current environmental debate As inspiring as his trailblazing *The Carbon Crunch* this volume will be essential reading for anyone concerned with reversing the headlong destruction of our environment

Sustainability Politics and Limited Statehood Alejandro Esguerra, Nicole Helmerich, Thomas Risse, 2016-11-25 The contributors to this book critically examine the performance of new modes of governance in areas of limited statehood drawing on a range of in depth case studies on issues of climate change biodiversity and health The Paris Agreement for Climate Change or the Sustainable Development Goals SDGs rely on new modes of governance for implementation New modes of governance such as market based instruments public private partnerships or stakeholder participation initiatives have been praised for playing a pivotal role in effective and legitimate sustainability governance Yet do they also deliver in areas of limited statehood States such as Malaysia or the Dominican Republic partly lack the ability to implement and enforce rules their domestic sovereignty is limited Exploring this perspective on governance the authors demonstrate that areas of limited statehood are not ungoverned or ungovernable spaces The book elaborates how and under what conditions new modes of governance emerge in areas of limited statehood and examines their relative effectiveness

Second Generation Biofuels and Biomass Roland A. Jansen, 2012-11-05 This guide to investing in the bioenergy market covers the topic from both a scientific economic and political perspective It describes the increasing number of second generation biodiesel projects which are now emerging in anticipation of growing sustainability concerns by governments and in response to market demands for improved process efficiencies and greater feedstock production yields The book also closely examines the science and technology involved in second generation biofuels and gives concrete examples such as in the aviation industry The result is an essential guide for scientists investors politicians and decision makers in the energy sector

Contemporary processes of largescale land acquisition by investors: Case studies from sub-Saharan Africa Laura German, George Schoneveld, Esther Mwangi, 2011 Rapid growth of emerging economies emerging interest in biofuels as an alternative to fossil fuels and recent volatility in commodity prices have led to a marked increase in the pace and scale of foreign and domestic investment in landbased enterprises in the global South Emerging evidence of the negative social and environmental effects of these large scale land transfers and growing concern from civil society have placed global land grabs firmly on the map of global land use change and public discourse Yet what are the processes involved in these large scale land transfers This paper provides a comparative analysis of legal and institutional frameworks and actual practices associated with large scale land acquisitions in Ghana Mozambique Tanzania and Zambia Drawing on policy documents interviews with government officials from diverse sectors and discussions with customary leaders and affected communities we explore some of the deficiencies in legislation and practice which currently undermine the ability to safeguard customary

rights in the context of large scale land acquisition *The World in 2050* Hamish McRae,2022-05-12 A dazzling history of the future Hamish McRae has given us a tour de force Tim Harford _____ A bold and illuminating vision of the future from one of Europe's foremost speakers on global trends in economics business and society What will the world look like in 2050 How will complex forces of change demography the environment finance technology and ideas about governance affect our global society And how with so many unknowns should we think about the future One of Europe's foremost voices on global trends in economics business and society Hamish McRae takes us on an exhilarating journey through the next thirty years Drawing on decades of research and combining economic judgement with historical perspective Hamish weighs up the opportunities and dangers we face analysing the economic tectonic plates of the past and present in order to help us chart a map of the future A bold and vital vision of our planet *The World in 2050* is an essential projection for anyone worried about what the future holds For if we understand how our world is changing we will be in a better position to secure our future in the decades to come **Climate Change** Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee,2006-09-18 *Green Gone Wrong* Heather Rogers,2013-01-16 Faced with climate change many counsel going green encouraging us to buy organic food or a clean car for example But can we rely on consumerism to provide a solution to the very problems it has helped cause Heather Rogers travels from Paraguay to Indonesia via the Hudson Valley Detroit and Germany's Black Forest to investigate green capitalism and argues for solutions that are not mere palliatives or distractions but ways of engaging with how we live and the kind of world we want to live in A new afterword considers various ways in which national development might be freed from its dependence on economic growth allowing for a decent standard of living without exhausting the planet's resources Industrial Agriculture and Ape Conservation Helga Rainer,Alison R. T. White,Arcus Foundation,Annette Lanjouw,2015-12-17 Presents new research and analysis along with case studies to examine the interface between ape conservation and industrial agriculture This title is available as Open Access

From Exclusion to Ownership? William D. Sunderlin, Jeffrey Hatcher, Megan Liddle, 2008 *Timber* Peter Dauvergne, Jane Lister, 2013-05-08

Timber is a vital resource that is all around us It is the house that shelters us the furniture we relax in the books we read the paper we print the disposable diapers for our babies and the boxes that contain our cereal detergent and new appliances The way we produce and consume timber however is changing With international timber companies and big box discount retailers increasingly controlling through global commodity chains where and how much timber is traded the world's remaining old growth forests particularly in the developing world are under threat of disappearing all for the price of a consumer bargain This trailblazing book is the first to expose what's happening inside corporate commodity chains with conclusions that fundamentally challenge our understanding of how and why deforestation persists Authors Peter Dauvergne and Jane Lister reveal how timber now moves through long and complex supply chains from the forests of the global South through the factories of emerging economies like China to the big box retail shelves of Europe and North America Well off consumers are getting unprecedented deals But the social and environmental costs are extraordinarily high as corporations mine the world's poorest regions and most vulnerable ecosystems The growing power of big retail within these commodity chains is further increasing South North inequities and unsustainable global consumption Yet as this book's highly original analysis uncovers it is also creating some intriguing opportunities to promote more responsible business practices and better global forest governance
